EDUCATION

University of Florida **Graduating 2027**

Bachelor of Science, Computer Science, Minor in Electrical Engineering | GPA: 3.93 | Honors: Dean's List *Gainesville, FL*

- Clubs: SASE (Society for Asian American Scientists and Engineers), JSA (Japanese Student Association), Japanese Club, Open Source Club, Club Swim
- Current Classes: Business Japanese, Operating Systems, Databases, Intro to Software Engineering

PROFESSIONAL EXPERIENCE

Software & Systems Developer | Saturiwa Trading Co. June 2025 - Present *Jacksonville, FL (Hybrid)*

- Integrated custom WooCommerce logic using **PHP** and **JavaScript**, enhancing shipping accuracy and reducing charge discrepancies by ~30%.
- Automated UPS rate calculations through real-time **API** integrations, optimizing shipping box selection based on product dimensions and weight.
- Developed backend debugging tools that traced packing decisions and invoice mismatches, reducing manual audit efforts by 50%.
- Implemented regional shipping messaging targeting Florida and Georgia, increasing ground shipping usage by ~40%.
- Designed and deployed localized pickup systems with dynamic UI enhancements for improved customer experience.
- Refactored legacy backend code and removed redundant plugins, significantly improving website performance and administrative usability.

Projects & Certificates

- **EZPark – Parking Ticket Prediction Tool** *August 2024*
  Demo video: https://www.youtube.com/watch?v=t9ylZeqqank
  - Built a **Flask**-based web app in **Python** to predict parking ticket risk using DC violation datasets; processed over 100K entries and visualized risk zones with heatmaps.
  - Processed and visualized citywide parking data using **Pandas**, **Matplotlib**, and **Geopy** to highlight ticketing hotspots and trends
- **NVIDIA x ColorStack UF Deep Learning Program** *February 2024*
  - Selected for a competitive, application-based program in collaboration with NVIDIA, where I earned the Deep Learning Institute **(DLI) certification** through intensive, hands-on model training and evaluation.
  - Built and optimized convolutional neural networks (CNNs) using **TensorFlow/Keras,** improving image classification accuracy from **72% to 91%** with hyperparameter tuning and transfer learning.
- **University of Florida Verizon Gator Hackathon** *October 2023*
  - Built a functional prototype of Verizon's website with a full-stack architecture and integrated a GPT-based chatbot that recommended phones and plans based on user queries.
- **TryHackMe "Introduction to Cyber Security Learning Path" Certificate** *June 2020*
  - Completed a hands-on learning path covering penetration testing, vulnerability scanning, and network analysis using tools like Wireshark, Nmap, Metasploit, and Burp Suite.
- **Full Stack Movie Review Site** (HTML, CSS, JavaScript, MongoDB, NodeJS) *December 2023*
  Source code: https://noahmoviesite.onrender.com/
  - Developed a full-stack application using Node.js, MongoDB, and MovieDB API to allow users to search movies, write reviews, and browse community feedback.
  - Built responsive frontend with HTML, CSS, and vanilla JavaScript, enabling real-time review submission and search functionality.
- **Cookly Mobile App - Developer**(React Native (Expo), NestJS, MongDB, Cloudinary) *January 2025 – April 2025*
  Demo video: https://www.youtube.com/watch?v=EMR1uKTLvqU
  - Worked in a 4-person team to design and build Cookly, a TikTok-style recipe app with React Native (Expo) frontend, NestJS backend, and MongoDB database.
  - Led development across both backend APIs (authentication, videos, comments) and frontend UI (main feed, upload, search, profile).

SKILLS

Languages & Frameworks: Python, JavaScript, HTML/CSS, C++, Bash, Node.js, Express, MongoDB, MATLAB, GO, C#
Tools & Technologies: Git, GitHub, Linux (Kali, Mint), Raspberry Pi, Tesseract OCR, TensorFlow, Flask, React, PHP
Other: Fluent in English & Japanese, Business Japanese (in progress)
