

Job Title: AI / Machine Learning Engineer

Location: Remote

Type: At least 20 hours/week with the potential to transition to Full-Time / Full Time

About Cappella: Cappella is a pioneering AI-driven baby monitoring app that translates baby cries, providing parents with insights into their baby's needs and offering appropriate soothing through sound. Developed by a team of experts from MIT, Berkeley, and Stanford, Cappella also tracks feeding, diaper changes, and sleep schedules, making it a comprehensive tool for baby care. Our mission is to enhance baby monitoring with sustainability and accessibility, helping parents repurpose old smartphones to reduce electronic waste.

Job Description:

We are seeking an exceptional AI / Machine Learning Engineer to join our team. This role is ideal for a talented individual currently completing or holding an undergraduate degree in Computer Science. The person will work remotely and contribute to the development and optimization of our AI algorithms, with the opportunity to make a meaningful impact on the lives of families worldwide.

Responsibilities:

- Collaborate with the data science team to develop and optimize machine learning models for baby cry analysis and other app functionalities.
- Assist in the collection, cleaning, and preprocessing of audio and meta-data for training and testing machine learning models.
- Conduct research and experiments to enhance the accuracy and efficiency of our AI algorithms.
- Implement machine learning models and integrate them into the Cappella app.
- Analyze model performance and suggest improvements based on findings.
- Stay up-to-date with the latest developments in AI and machine learning to ensure our technology remains cutting-edge.
- Document processes and findings to support knowledge sharing within the team.

Requirements:

- Currently completing or holding an undergraduate degree in Computer Science from MIT or a similar institution.
- Strong understanding of machine learning algorithms and principles.
- Experience with programming languages such as Python, and familiarity with machine learning frameworks like TensorFlow, PyTorch, or similar.
- Ability to work independently and collaboratively in a remote team environment.

- Available to start immediately for at least 20 hours a week, with the potential to transition to a full-time role.
- Even candidates seeking a summer internship are encouraged to apply.

What We Offer:

- Hands-on experience in a cutting-edge AI startup.
- Mentorship from a team of experts in AI, machine learning, and baby care.
- Flexible working hours with the potential to transition to a full-time role.
- Opportunity to make a significant impact on the well-being of families worldwide.
- A collaborative and innovative work environment.

How to Apply: Please send your resume to apo@cappella.io. We welcome applications from candidates seeking summer internships or those available to start immediately. Join Cappella and be part of a team that is revolutionizing baby care through AI!
