

Education

Istanbul Bilgi University

2021 – 2026

Bachelor of Science in Computer Engineering; GPA: 3.35/4.0

Graduation Thesis: Reinforcement Learning for LLM-Based Listwise Reranking in Turkish Information Retrieval

Experience

Codeway

Istanbul, Turkey

DevOps Engineer Intern

Dec 2025 – Present

- I work across DevOps/SRE, platform engineering, and MLOps. My work includes designing and operating cloud native infrastructures, improving developer experience, and enabling teams to reliably deploy, monitor, and scale backend services and ML workloads. I work hands-on with Kubernetes, CI/CD, GitOps, observability stacks, and production ML workflows.

sahibinden.com

Istanbul, Turkey

Machine Learning Engineer Intern

Sep 2025 – Dec 2025

- Transitioned a rule-based moderation pipeline to an LLM-based system for Turkish user messages, improving semantic violation detection (advertising, fraud, toxicity, off-platform contact) and reducing false negatives by 35%.
- Developed a fast and scalable LLM inference service on GCP using Pub/Sub for asynchronous message processing, enabling low-latency moderation and reasoning generation over 150K–200K user messages daily.
- Fine-tuned smaller open-source LLMs using weakly supervised user message data to achieve comparable moderation performance to proprietary APIs while reducing inference cost.
- Automated dataset versioning and annotation checks via CI/CD and cloud triggers, ensuring data integrity across releases.
- Integrated evaluation and monitoring dashboards to track latency, drift, and violation trends for continuous improvement.

P.I. Works

Istanbul, Turkey

DevOps Engineer Intern

Jul 2025 – Sep 2025

- Contributed to internal DevOps AI agent development with LLMOps workflows, leveraging Retrieval-Augmented Generation (RAG), prompt engineering, and vector search to analyze commits and pipeline failures.
- Built and maintained CI/CD pipelines using GitLab CI/CD, Bash, and Python on Linux environments, automating dependency scanning, version tracking, and quality checks for greater reliability.
- Deployed and managed containerized applications on bare-metal Kubernetes clusters.
- Managed infrastructure observability through monitoring and alerting with Prometheus and Grafana, and centralized logging via the ELK Stack (Elasticsearch, Logstash, Kibana).

COSMOS AI Research Group, Yıldız Technical University

Istanbul, Turkey

AI Research Assistant

Jan 2025 – Jun 2025

- Selected for the TÜBİTAK 2247-C STAR Scholarship Program. Conducted research under the supervision of Prof. Mehmet Fatih Amasyalı.
- Fine-tuned Turkish Large Language Models (LLMs) to improve mathematical reasoning capabilities, curating and organizing custom datasets aligned with research objectives.
- Applied Reinforcement Learning (RL) to enhance reasoning and decision-making in NLP tasks, delivering a 20% improvement on Turkish grade-school math benchmarks with a compact model.

Insider

Istanbul, Turkey

Machine Learning Engineer Intern

Aug 2024 – Dec 2024

- Supported the search team in building a high-scale, multi-indexed search platform for improved search relevancy and personalized e-commerce results.
- Contributed to batch and streaming pipelines for data ingestion, daily embedding extraction and large-scale vector indexing using AWS Lambda, SQS, S3, Kinesis Firehose, and Redis.

- Assisted in testing hybrid retrieval methods and reranking models for better multilingual search relevance in production.
- Contributed to the Faceted and Banner Merchandising features with FastAPI, Elasticsearch, and Spring Boot, enabling customizable search experiences for partners.
- Gained hands-on experience in ML workflows and model deployments using Airflow and SageMaker, and optimizing microservices on AWS, Kubernetes, and Docker.
- Configured and provisioned AWS EC2 instances using Terraform and Terragrunt to support internal tool development.

Istanbul Bilgi University
Big Data Research Assistant

Istanbul, Turkey
Mar 2024 – May 2024

- Contributed to an economic research project at the Center for Financial Studies (CEFIS) by scraping and analyzing large-scale inflation data, applying time series modeling for trend prediction, and automating pipelines with Scrapy, Playwright, Docker, and Cron to ensure efficient, reliable data collection.

Insider
Software Developer Intern

Istanbul, Turkey
Jul 2023 – Sep 2023

- Built full-stack e-commerce personalization features with Node.js, developing REST APIs, scalable backend services for behavior tracking and customer segmentation, and contributing to CI/CD pipelines and codebase refactoring to ensure scalable, high-traffic platform performance.

Skills Summary

Focus Areas: Machine Learning, Software Engineering, Infrastructure, Deep Learning, NLP, LLMs, Agentic AI

Programming Languages: Python, JavaScript/TypeScript, Go, Java

Tools & Technologies: FastAPI, PyTorch, Kubernetes, Docker, Elasticsearch, Redis, Airflow, Node.js, Spring Boot, HuggingFace, LangChain, SQL, PostgreSQL, Git

Platforms: Amazon Web Services (AWS), Linux

Volunteer Experience

Founding Board Member
Bilgi Software Community

Istanbul, Turkey
Dec 2023 – Dec 2024

- Started a student community at Istanbul Bilgi University to create an environment where students interested in computer science can network with each other, work on group projects, and share their knowledge and opinions on different subjects.

Software Development Team Member
Bilgi Blockchain

Istanbul, Turkey
Feb 2024 – Feb 2025

- Supported blockchain project development and community contributions by organizing hackathons, producing the YouTube series Zincirsiz, and actively engaging in team ideas and events.

Software & Communication Team Member
Bilgi Robotics

Istanbul, Turkey
Oct 2022 – Apr 2023

- Participated in the TUBITAK Teknofest Hyperloop Development Competition and played an active role in the work of the software team and the preparation of the project report.
