PROFESSIONAL SUMMARY

Dedicated and results-driven Data Analyst with a strong background in conducting in-depth data analysis and providing actionable insights to drive informed decision-making. Proficient in data visualization, statistical analysis, and predictive modeling. Seeking opportunities to leverage analytical skills and expertise in contributing to data-driven strategies.

CORE SKILLS

- Data Analysis: Proficient in utilizing tools such as Excel, SQL, and R to analyze and interpret complex datasets, with ongoing efforts to bolster my analytical prowess through learning Python.
- Data visualization: Experience with data visualization and reporting tools such as Power BI and Tableau.
- Statistical Analysis: Proficient in applying a range of statistical techniques to extract meaningful insights from data
- Problem Solving: Strong analytical and critical thinking skills, with the ability to identify patterns and trends in data.
- Communication: Excellent written and verbal communication skills, adept at presenting findings to stakeholders.
- Time Management: Proven ability to prioritize tasks, meet deadlines, and manage multiple projects effectively.
- Adaptability: Quick learner with a passion for acquiring new skills and staying updated with the latest data analysis methodologies.

KEY ACHIEVEMENTS

- Developed interactive dashboards using Power BI and Tableau, effectively communicating complex insights to stakeholders, with 95% positive feedback on clarity and impact.
- Optimized fuel inventory management, reducing excess stock by 25% over 5 years using data-driven demand forecasting.
- Implemented a data-driven pricing strategy, increasing LNG sales volume by 18% over 5 years.
- Designed and presented insightful reports that influenced strategic decision-making, resulting in a 10% increase in operational efficiency.
- Led data analysis efforts that identified trends and anomalies in customer behavior, contributing to a 15% increase in customer retention.

WORK EXPERIENCE:

DATA ANALYST (VIRTUAL INTERNSHIP)

QUANTUM ANALYTICS NG APR 2023 - PRESENT

Key Responsibilities:

- Conducted in-depth data analysis on various projects, including energy consumption trends, NYC taxi trips, and historical shark attacks, using tools like Excel, Power BI, Tableau, and SQL.
- Developed and implemented data preprocessing techniques to ensure data accuracy and consistency, resulting in improved analysis quality.
- Created interactive and visually compelling dashboards in Power BI and Tableau, effectively communicating complex data insights to stakeholders.
- Collaborated with cross-functional teams to identify data requirements, contributing to the successful execution of data-driven strategies.
- Assisted in the development of data-driven models and predictive analytics using SQL to optimize processes and enhance business performance.
- Conducted data research and trend analysis, providing valuable insights to support strategic decision-making

Projects

Energy Consumption Analysis

- Conducted in-depth analysis of energy consumption trends, energy sources proportions, and consumption patterns over time.
- Utilized Power BI to visualize and interpret the data, providing valuable insights into the energy mix and its environmental impacts.
- Identified that non-renewable energy sources, including oil, coal, gas, and nuclear, accounted for approximately 92% of the overall energy mix, while renewable sources contributed only 8%.
- Formulated recommendations to promote renewable energy investments, diversify energy sources, enact policy frameworks, allocate funds for research and development, and implement energy efficiency measures.

Historical Stock Price Project

- Analyzed historical stock price data to identify market trends and patterns for investment strategies.
- Built interactive stock price visualizations using Tableau to aid in investment decision-making.

DATA ANALYST INTERNSHIP

HAGITAL CONSULTING LTD NOV 2022 – APR 2023

Key Responsibilities:

- Gathered and cleaned large datasets from various sources for analysis and reporting using SQL, R, and Excel.
- Developed and maintained interactive dashboards using Power BI and Tableau for data visualization and storytelling
- Conducted exploratory data analysis to identify trends, outliers, and patterns
- Applied statistical techniques to analyze data and provide actionable insights to clients
- Collaborated with cross-functional teams to develop data-driven solutions and strategies
- Assisted in creating and presenting reports and presentations to clients and stakeholders
- Conducted data quality checks and ensured data integrity throughout the analysis process

Projects

Superstore Sales Analysis using Power BI and Power Query

- Extracted and transformed sales data using Power Query, ensuring data accuracy and consistency.
- Developed interactive dashboards and reports in Power BI to analyze sales performance across various dimensions, such as product categories, regions, and customer segments.
- Presented actionable insights and recommendations to management for strategic decision-making.

Pizza Sales Analysis using Microsoft Excel

- Analyzed pizza sales data using Microsoft Excel, performing data cleaning, aggregation, and trend analysis to identify key drivers of sales performance and customer behaviour.
- Utilized pivot tables, charts, and advanced Excel functions to visualize sales trends, customer segmentation, and product performance.
- Effectively communicated actionable insights and recommendations to senior management resulting in improved marketing strategies, pricing decisions, and customer satisfaction

Querying of DVD Rentals Database using SQL

- Utilized SQL queries to extract and analyze data from the dvdrentals database, including customer behaviour, rental patterns, and revenue analysis.
- Conducted data exploration, analysis, and visualization to identify trends, patterns, and opportunities for process improvement.
- Generated comprehensive reports and visualizations to communicate findings to stakeholders, facilitating data-driven decision-making.

- Vehicle Insurance Fraud Claim:
- Conducted fraudulent claim detection analysis in an insurance company, leveraging statistical modeling, data mining techniques, and visualization tools to identify patterns and anomalies
- Offered management a concise summary of key findings and actionable recommendations.

BUSINESS INTELLIGENCE ANALYST

BEACON OF LIGHT PETROLEUM SERVICES LIMITED FEB 2018 – AUG 2022

Key Responsibilities:

- Utilized data analysis techniques to boost sales revenue by 15% over two years through insights from sales, inventory, and customer data.
- Developed an advanced sales forecasting model that improved accuracy by 20%, optimizing inventory and reducing operational costs.
- Segmented customers based on data, leading to a 25% increase in retention and 15% growth in acquisition through targeted campaigns.
- Optimized profit margins by 10% through a comprehensive pricing analysis of petroleum products.
- Created an interactive BI dashboard, cutting information access time by 20%, aiding quicker, informed decisions.
- Fostered a data-driven culture via workshops, leading to 15% higher BI tool usage and enhanced problem-solving.
- Enhanced customer satisfaction by 18% through actionable insights from a customer feedback analysis system.

BUSINESS OPERATION ANALYST

BOVAG PETROLEUM LIMITED JAN 2013 – FEB 2018

Key Responsibilities:

- Conducted detailed data analysis of fuel and lubricant sales trends, identifying opportunities for revenue growth and cost optimization.
- Collaborated with sales, marketing, and supply chain teams to develop accurate demand forecasts, ensuring optimal fuel inventory levels at petrol and LNG stations.
- Utilized pricing data and market insights to implement competitive pricing strategies, leading to a 12% increase in market share and an 8% improvement in profitability.
- Led initiatives to optimize transportation routes for fuel and lubricant distribution, reducing delivery lead times by 15% and decreasing transportation costs by 10%.
- Implemented a customer loyalty program, resulting in a 20% increase in customer retention and higher customer satisfaction scores.
- Conducted competitor analysis and market research to identify emerging industry trends and potential business expansion opportunities.
- Collaborated with the IT team to implement technology solutions for automated sales reporting and streamlined order processing, reducing manual errors by 7%.

EDUCATION & CERTIFICATION

- Google Finance Data Analyst Professional Certificate (2023)
- Business Analyst Accredited Certification™ IO4PM – In View
- Trainings in Excel, SQL, Power BI by Quantum Analytics and Hagital Consulting
- B. Tech in Applied Biochemistry, Federal University of Technology Akure, Nigeria-2001.
