

Aditya Patil

📍 Thane, Mumbai | apaditya041@gmail.com | [+91 7506834297](tel:+917506834297)

Overview

Full Stack Developer with 3+ years of experience in **Node.js, Express.js, MongoDB, and React.js (MERN)**. Skilled in scalable **REST APIs**, and third-party integrations. Strong in **React.js** and backend optimization. Experienced with **Docker, AWS, CI/CD** for seamless deployments. Basic knowledge of **blockchain, smart contracts, and Web3.js**.

TECHNICAL SKILLS

Backend & API Development: Node.js, Express.js, REST APIs, Microservices, WebSockets

Frontend: React.js, Next.js, Redux, Tailwind CSS

Databases: MongoDB, PostgreSQL, Firebase, Redis

Cloud & DevOps: AWS (EC2, S3, Lambda), Docker, CI/CD Pipelines

Messaging & Chatbots: WhatsApp API, Webhooks

Security & Authentication: JWT, OAuth, Role-Based Access Control

Blockchain : Solidity, Web3.js, Smart Contracts

EXPERIENCE

91 Design Studio(DI&T), Thane— Software Developer

May 2024 - Nov 2024

I drive end-to-end development of **web applications**, ensuring seamless functionality and optimized performance. I have built **HR management platforms, customer support solutions, and real-time collaboration tools**, helping businesses streamline operations and improve efficiency.

quintessential Hospitality Management Platform(POS)

I played a key role in building the **POS (Point of Sale) system** for the hospitality platform, ensuring seamless transaction processing and real-time data synchronization. I was responsible for **requirement gathering, designing a scalable MongoDB schema**, and developing **secure RESTful APIs in Express.js** to handle orders, payments, and inventory management. I implemented **role-based access control (RBAC)** to enhance security

while integrating **WebSockets for real-time order updates and notifications**. My work optimized transaction efficiency, reduced processing delays, and improved the overall customer experience within the hospitality industry

Tech Stack: Node.js, React.js, MongoDB, AWS

Skills Used: Real-Time Data Sync, Task Management, Notifications, Analytics

HR Community Management App

Tech Stack: Node.js, Express.js, MongoDB, React.js, AWS (EC2, S3, Lambda)

Skills Used: REST APIs, Authentication, Role-Based Access Control, WebSockets, Microservices

Impact: Enabled **HR professionals and individuals** to create and manage their own **communities**, post jobs, and facilitate seamless **community-driven hiring and engagement**.

WhatsApp Chatbot

Tech Stack: Node.js, Express.js, MongoDB, AWS Lambda, Twilio API

Skills Used: Team Lead, API Integration, Webhooks, Real-time Messaging, Content Creation, Requirement Gathering

Impact: Automated **80% of customer queries**, cut response times by **70%**, and improved customer engagement.

Furation Tech , Mumbai — Software Developer

May 2023 - april 2024

Led teams in **Node.js development**, building scalable **Web2 applications** with **RESTful APIs, middleware, and microservices**. Designed and implemented **secure, high-performance backend systems** for various domains, including **restaurant management, education, and enterprise solutions**. Integrated third-party services like **WhatsApp chatbots, role-based access control, and real-time notifications**, ensuring seamless user experiences and operational efficiency

Key Projects:

Reserve 1st: A restaurant management & reservation system with table booking, alerts, WhatsApp chatbot, floor plans, and role-based access using Express.js, Node.js, and MongoDB.

Whistling Woods WebApp: An academy admission and inquiry portal with real-time course updates.

Whistling Woods NFT Marketplace: A blockchain-based NFT platform using Solidity, Express.js, Node.js, MongoDB, and AWS.

Smart Genesis, Pune — Software Developer

May 2021 - March 2023

Started as a Software Developer, initially focusing on backend development with **Node.js and Express.js**, later expanding into full-stack development with **React.js and MongoDB**. Led the development of multiple projects across diverse industries, ensuring **scalability, security, and performance optimization**.

Bitnautic – A shipping industry platform designed to handle document management, booking, and real-time tracking. Built a secure backend system in Node.js & MongoDB for seamless logistics operations, integrated real-time status updates using WebSockets, and optimized API performance for large-scale data handling.

SinghApp – A social media platform enabling real-time content sharing, messaging, and user engagement. Developed an interactive frontend using React.js & Redux, implemented role-based access control (RBAC), and optimized the database structure in MongoDB for fast query execution.

CloseSphere – An NFT marketplace supporting buying, selling, and trading of digital assets. Built RESTful APIs in Express.js, integrated payment gateways, and implemented secure authentication with JWT and OAuth for user identity protection.

NMMC Portal – A municipal service management system for handling public service requests and complaints. Developed a scalable backend using Node.js & Express.js, ensuring secure data processing, and integrated automated request tracking for improved public engagement.

MetaEstate – A real estate listing portal designed for seamless property listings, agent interactions, and search optimization. Built dynamic UI components in React.js, optimized backend APIs for faster property searches, and implemented cloud-based image storage (AWS S3).

WhatsApp Chatbot – A custom-built chatbot application for automated customer support and lead generation. Integrated WhatsApp business API & Webhooks, developed AI-driven responses, and automated real-time notifications to enhance user experience.

Tech Stack: Node.js, Express.js, MongoDB, React.js, AWS, Python

Skills: REST APIs, Authentication, Microservices, Scalable System Design

Designed efficient and secure architectures, integrated blockchain with Web2 applications, and optimized backend workflows for seamless performance & user experience.

Chainsense , Mumbai— Intern Blockchain Developer

May 2019 - Nov 2020

Started as an **Intern Developer** at Chainsense, where I began learning JavaScript, Node.js, and Express.js, gradually building a strong foundation in backend development. I also explored Web3.js and blockchain concepts. After the initial learning phase, I worked on **live projects**, gaining hands-on experience in integrating blockchain with web applications

EDUCATION

V.G vaze Kelkar College Mulund, Mumbai — Bsc.IT

June 2018 - May 2021

I completed my B.Sc. IT at Kelkar College, where I gained foundational knowledge in programming. As part of my final year, I successfully developed projects in website development and a marketplace, showcasing my ability to apply technical skills to real-world scenarios.

Certification

[Deloitte- Data Analytics](#)

[IBM - Blockchain Essentials](#)

Additional Skills

Professional Skills:

- Problem-Solving & Critical Thinking
- Team Collaboration & Leadership
- Strategic Communication
- Adaptability & Continuous Learning
- Creativity & Innovation
- Project Management & Execution
- Research & Analytical Skills
- Prompt Engineering
- Agile Methodologies (Scrum, Kanban)
- SEO

Productivity & Collaboration Tools:

- Notion, Miro
- Jira (Agile Project Management), Trello, Asana
- Microsoft Excel, PowerPoint, Google Workspace
- Git, GitHub, GitLab

LANGUAGES

English, Hindi, Marathi
