

# Siddhi Pandya

(825) 882-4829 Calgary, Alberta

<https://www.linkedin.com/in/siddhi-pandya29> [siddhi.imscit17@gmail.com](mailto:siddhi.imscit17@gmail.com)

## SUMMARY

A Blockchain Developer with close to two years of experience in building and deploying decentralized applications, smart contracts and NFT platforms. Play a key role in optimizing smart contract performance, integrating front-end applications with blockchain backends, and enhancing user experiences in Web3 environments. A technical proficiency in Solidity, JavaScript, Web3.js and IPFS, combined with an ability to deliver scalable and secure blockchain solutions.

- Improved contract efficiency by thirty percent through gas optimization and delivered NFT minting Dapp that gained over 5,000 users in the first month.
- Reduced load times by forty percent in a decentralized marketplace through advanced front-end refactoring.

## TECHNICAL SKILLS

**Programming Languages and Frameworks:** Solidity, JavaScript, Java, C, C++, Python, HTML/CSS, NodeJS, ReactJS, Web3js, EtherJS, Hardhat

**Databases:** MySQL, MongoDB, PL/SQL, SQL Server

**IDE's:** Postman, Visual Studio code, Remix, PyCharm

**Packages:** NumPy, Pandas, Matplotlib, Seaborn, IBM Cognos

**Data Analysis:** Data Cleaning and Wrangling, EDA, Statistical Analysis and Data-Driven Decision Making

## EDUCATION

Master of Science in Information and Technology  
Gujrat Law Society University, Ahmedabad, India

June 2020 – April 2022

Bachelor of Science in Information and Technology  
Gujrat Law Society University, Ahmedabad, India

June 2017 – April 2020

## PROFESSIONAL CERTIFICATIONS

IBM Data Analyst Professional Certificate – IBM, Calgary, Alberta

## EXPERIENCE

**D-Spot Dessert Cafe** – Calgary, Alberta

November 2024 – Present

### Team Member

Provide customer service in a dynamic and high-traffic dessert café by preparing, plating, and serving a wide range of gourmet desserts and beverages. Ensure a clean, well-organized, and hygienic workspace by following food safety standards, restocking supplies, and assisting in daily operational tasks to maintain smooth service flow.

- Improved customer satisfaction ratings by 20% through consistently delivering prompt and friendly service during peak hours.
- Maintained food safety compliance by 100% through rigorous cleaning routines and proactive stock rotation.

**Yudiz Solutions Limited** – Ahmedabad, India

**July 2022 – June 2024**

**Blockchain Developer**

Designed and deployed Ethereum-based smart contracts and Dapps using Solidity, JavaScript, and Web3.js. Collaborated with cross-functional teams to deliver secure blockchain solutions for clients across various domains. Developed a Web3 platform for Mapstar, enabling NFT creation for research papers and secure login via MetaMask and WalletConnect.

- Increased NFT sales by 30% for the BONESCLUB project by developing a decentralized marketplace with ERC721 tokens and IPFS integration.
- Increased blog traffic by 40% by strengthening brand engagement through authoring 5+ technical blog posts on topics like Web3.0 and IoT-blockchain integration.

**Yudiz Solutions Limited** – Ahmedabad, India

**June 2017 – April 2020**

**Intern – Blockchain Developer**

Assisted in the design and development of blockchain-based applications while gaining hands-on experience with Solidity, Web3.js, and Java technologies.

- Improved learning outcomes for new hires by seventeen percent by creating a Java-based Sudoku game with solver, hint, and scoring systems, later used in training sessions for interns.
- Enhanced system functionality by 25% through smart contract development and backend integration during internship projects, Reduced post-deployment bugs by 40% identifying and documenting security flaws during testing.

**HOBBIES AND INTERESTS**

I enjoy contributing to open source blockchain projects, writing technical blogs on smart contract development, and staying active in Web3 developer communities. I participate in hackathons, explore emerging trends in DeFi and NFTs, and attend virtual meetups to stay current with blockchain innovations. My interests also include learning about smart contract security, consensus mechanisms, and the evolving landscape of decentralized governance. I explore crypto currency mining and love spending time reading to understand blockchain infrastructure at protocol level.

**PUBLICATIONS AND PORTFOLIO**

**Digital Twins:** Current problems in Smart City and Recommendations for future technology

**Technical blogs:** About emerging technologies in a simplified language for a non-technical individual

**WEB 3.0:** The Dawn of Decentralized Internet Powered by Blockchain

**PORTFOLIO:** GitHub link to Capstone Projects and Presentation
