Barcelona, Anzoátegui, Venezuela

EDUCATION

Specialist in Quality Systems
Universidad Católica Andrés Bello (UCAB)
2009 - 2012

Systems Engineer
Universidad Bicentennial de Aragua (UBA)
2001 - 2007

TECHNICAL SKILLS

- Process Mapping & Architecture
- Quality Management Systems (ISO 9001)
- Information Security (ISO 27001)
- AWS Cloud Governance & Architecture
- Workflow Automation & AI Agents
- Linux / DevOps / Docker
- PostgreSQL / MySQL
- Python / TypeScript / NodeJS / NextJS
- Advanced Excel & Data Analytics

LANGUAGE

Español

Inglés

SUMMARY

Systems Engineer and Quality Specialist with 15+ years of experience in digital transformation, process automation, and IT governance. Highly adept at process mapping and standardizing operations under ISO 9001/27001. Skilled in engineering secure data flows and AI-driven solutions to optimize operational continuity and support data-driven decision-making.

EXPERIENCE

- 2025- Present
Independent Consultant
Cloud Solutions & IT Modernization Architect
Provide strategic consulting in AWS Cloud Governance and IT modernization. Deliver secure, containerized architectures (Docker) and implement advanced AI-driven agents to automate business workflows, optimize operations, and streamline data-driven corporate decision-making.
- 2023- 2025
Dango Digital
E-commerce Solutions & Integration Engineer
Engineered high-performance enterprise commerce platforms with a focus on automation and API workflows. Designed custom backend integrations, synchronized complex multi-platform data pipelines, and managed robust CI/CD deployment environments via GitHub.
- 2019 - 2023
Danios, C.A.
Full-Stack Software Engineer
Led full-stack engineering for data-driven applications utilizing NodeJS, NextJS, and PostgreSQL. Built scalable backend structures and optimized automated data ingestion pipelines, ensuring high system availability and strict information security compliance.
- 2014 - 2019
Transporte Dyscar, C.A
Head of Operations & IT Systems
Led comprehensive logistics, personnel management, and IT infrastructure for heavy-freight transport operations across eastern Venezuela. Directed client relationships, dispatch scheduling, and fleet maintenance while managing a cross-functional team of coordinators and drivers under high-pressure environments.
- 2005 - 2014
Corpoelec
Information Security Engineer
Managed comprehensive information security risks and IT infrastructure controls for the largest state-owned utility plant in Venezuela. Implemented robust security controls based on ISO/IEC 27001 standards across an internal network of +5,000 endpoints. Conducted internal penetration testing (OWASP), vulnerability assessments, and automated patch management. Led security awareness training programs and deployed open-source solutions for a large-scale Debian GNU/Linux infrastructure.
