

Cybersecurity Analyst Cover Letter

7670 Crist PlainsTremblayport, AK 98463

Dear Phoenix Donnelly,

Please consider me for the cybersecurity analyst opportunity. I am including my resume that lists my qualifications and experience.

In my previous role, I was responsible for support for day-to-day security operations activities, vulnerability and threat management, threat hunting, and security incident management and forensic analysis.

Please consider my qualifications and experience:

- Support COTF / DOT&E Cyber Security Testing Requirements
- Interface with waterfront, shipboard, and land-based test site personnel on cybersecurity issues
- Understand TCP/IP protocol suite, TCP/IP headers and packets, the OSI model, and commonly used TCP/UDP ports and associated services
- Monitor and analyze firewall logs, router syslog, and network/host-based IDS/IPS
- Work cohesively with PEO LCS Cyber Senior (SES and Flag level) leadership, internal & external personnel to timely meet demand signals and work tasks to closure
- Experience troubleshooting software and hardware issues
- Knowledge and work experience with FedRAMP, PCI, VISA, SSAE16 or other related security certification schemas
- Software as a Service solutions and cloud experience strongly preferred, with exposure to technologies such AWS, Azure, Docker, Chef, Puppet, or Ansible

Thank you for considering me to become a member of your team.

Sincerely,

Greer Reichert
