

SOFTWARE DEVELOPER

C# - TYPESCRIPT - SOLIDITY - AI INTEGRATION

KARAMOKO ISRAEL ABDELAZIZ AXEL

Email: contact@karamokoisrael.tech | LinkedIn: [israel-karamoko](#) | Portfolio: [karamokoisrael.tech](#)

I am Israel Karamoko, a **full-stack** software developer and **technology consultant** passionate about helping startups and fast-growing markets build secure, scalable, and practical digital solutions. My work focuses on leveraging AI, blockchain, and automation to drive innovation, accelerate product development, and create real impact.

PROJECTS

CRYPTO MARKET AFRICA 2024

- A **cryptocurrency exchange** app that helps people buy and sell cryptocurrencies using local payment methods, bridging cross-border transactions in Africa.
- Scaled the app to over 3,000 active users across West Africa, with a steadily growing transaction volume.

PROFESSIONAL EXPERIENCE

SAYGE AI 11/2025-03/2026

- **Full-stack developer** on Sayge, an AI-powered content testing and decision-support SaaS platform.
- Built backend APIs and database schemas supporting A/B testing workflows, task state management, and billing settlement.
- Contributed to end-to-end A/B testing pipelines, including async task dispatch, result polling, and transactional consistency.
- Collaborated on agent-based simulation logic to emulate audience behavior and generate aggregate insights and worked closely with cross-functional teams in a bilingual (Chinese/English) environment.

AFRIQ'SOLUS 08/2024 - 09/2025

- **Technical Lead:** supervising and actively working in the development of a real estate mobile app similar to AirBnb
- Working on the backend with NestJS
- Making production ready configurations with Docker, Cloudflare, Redis...

INEXA CI & RISKLOGICS CONSULTING

11/2022 - 05/2024

- Main **backend developer** for operational Risks management project (Nest JS, Docker and MongoDB).
- Involved in the development and maintenance of libraries including a real-time notifications library for client stock market activities using .Net 5, SignalR, and REST API.
- Maintaining message brokers and Sql Server Databases.
- Helping front-end development team with Angular.

CRYPTOMARKET CI

09/2021-11/2022

- In charge of **Backend development** for the exchange platform (Dotnet Core Web API).
- In charge of front-end development (React JS and React-Native) .
- Working on smart contracts and token creation on Solana and Ethereum.

KAIZER PHOENIX

09/2020-11/2022

- Part-time **web and mobile app developer** with React-Native, React JS, NodeJS and Python.

EDUCATION

ZHEJIANG UNIVERSITY OF SCIENCE AND TECHNOLOGY

2024

- Studying **Robotics Engineering** at Zhejiang University of Science and Technology (China).
- Currently working on a secured and automated parking management system with VLMs, anticipated graduation in 2026.
