ACHIEVEMENTS

Optimized ETL processes, reducing data load time by 30%.

Developed a data pipeline that improved data accessibility for analytics by 40%.

Implemented data quality checks that decreased errors in reporting by 25%.

PROFESSIONAL SUMMARY

Results-driven Data Engineer with 10 years of experience in designing and optimizing data pipelines, implementing ETL processes, and leveraging big data technologies to drive business insights and efficiency.

WORK EXPERIENCE

Sr. Data Engineer

Dec / 2018-Ongoing

Pineapple Enterprises

Santa Monica, CA

1. Collaborated with cross-functional teams to design and implement scalable data pipelines for big data processing.
2. Developed and optimized ETL processes to ensure efficient data ingestion and transformation.
3. Utilized Apache Spark and Hadoop to process large datasets, enhancing data processing speed and efficiency.
4. Created data models and schemas to support analytics and reporting requirements.
5. Implemented data quality checks and monitoring systems to ensure data integrity and reliability.
6. Led a team of data engineers in the development of data solutions that improved operational efficiency.
7. Worked with stakeholders to gather requirements and develop use cases for data solutions.

Data Engineer

Dec / 2014-Dec / 2018

Summit Peak Industries

Denver, CO

1. Integrated diverse data sources into a unified data model for analytics and reporting.
2. Engineered Python and SQL solutions to automate data processing tasks and improve efficiency.
3. Developed machine learning models to enhance data-driven decision-making processes.
4. Collaborated with data scientists to ensure data availability for predictive analytics.
5. Debugged and optimized data workflows running on cloud platforms like AWS and Azure.

EDUCATION

Master of Science in Data Science

Dec / 2011-Dec / 2014

University of California, Berkeley

Denver, CO

Focused on data engineering, machine learning, and big data technologies.
