WORK EXPERIENCE

Data Engineer

Consumer Reports

📅 May 2025 - current

📍 New York, NY

- Engineered Spring Boot services that unified product-testing data feeds, cutting downstream reconciliation errors by 17% across editorial and ratings workflows.
- Optimized Java ingestion logic for consumer-review pipelines, trimming average processing latency to 842 ms during peak publishing windows.
- Orchestrated Kafka event streams that delivered standardized data to 7 internal consumers without adding duplicate handoff steps.
- Hardened PostgreSQL models for ratings-history lookups, *saving analysts 13.4 hours per week* on manual validation pulls.

Business Analyst

Guardian Life Insurance Company

📅 August 2023 - April 2025

📍 New York, NY

- Automated policy-report preparation in Alteryx, shortening recurring underwriting turnaround by 2.7 days for regional business reviews.
- Standardized KPI definitions for claims and enrollment metrics, reducing variance between finance and operations reports to 11 basis points.
- Developed and implemented exception-tracking protocols using Alteryx for three high-volume dashboards, *reducing audit follow-ups* to 3 per quarter.

Research Assistant

Federal Reserve Board of Governors

📅 August 2022 - July 2023

📍 Washington, DC

- Programmed reproducible policy charts in R, moving economist-ready refresh cycles from manual compilation to 94 minutes end to end.
- Validated forecast tables with Python checks, *lowering pre-brief revision rounds* to 2 per memo for senior research staff.
- Compiled publication exhibits in LaTeX, giving economists finalized tables 1.8 days earlier ahead of internal review deadlines.

EDUCATION

B.A.

Computer Science

University of Pittsburgh

📅 May 2018 - April 2022

📍 Pittsburgh, PA

SKILLS

Tools

- Spring Boot
- Java
- Kafka
- PostgreSQL
- Docker
- Alteryx

Methods

- Reproducible research
- KPI standardization
