PROFILE

Data Scientist with a Master's in Data Science (Distinction) and 3+ years of professional experience applying machine learning, LLMs, and data engineering to real-world problems across FinTech and AgriTech. Skilled in building production ML pipelines, recommendation systems, and demand forecasting models. Experienced in leading cross-functional teams to deploy AI-driven products that enhance customer experience and business outcomes.

EDUCATION

BSc Economics and Finance, University of East Anglia, Norwich

Sept 2015 — Aug 2018

MA Data Science, University of Surrey, Guildford

Sept 2020 — Jun 2022

- Graduated with Distinction

EMPLOYMENT HISTORY

Senior Data Scientist at FarmByte, Kuala Lumpur

May 2025 — Present

- Designed and deployed **machine learning models** for demand forecasting and pricing, enhancing planning accuracy and reducing excess inventory/wastage.
- Developed **LLM-powered recommendation systems** 'improved product matching and driving more personalized farmer/merchant experiences.
- Automated **reporting pipelines** with SQL, AWS, and Airflow 'streamlined delivery of insights and reducing manual reporting overhead.
- Led the development of **AI-driven solutions** for crop advisory, dynamic pricing, and demand-supply alignment, supporting more data-informed decision-making.
- Partnered with **product, engineering, and commercial teams** to embed data-driven insights into day-to-day operations and strategic workflows.

Senior Backend Developer at FarmByte

Dec 2024 — May 2025

- **Designed and implemented data pipelines and APIs** to support real-time analytics and ML model integration.
- **Built ETL workflows** combining structured (MySQL) and unstructured (MongoDB, image) data for downstream AI/ML tasks.
- **Deployed TensorFlow and OpenCV models** into production pipelines in collaboration with data scientists.
- **Refactored legacy monolith into modular microservices**, improving scalability and enabling efficient ML/DS integration.
- **Implemented monitoring and logging tools** to track ML model performance and system reliability in production.
- **Conducted JMeter performance tests**, reducing latency and strengthening pipeline efficiency.

Freelance Web Developer at Lulla, Kuala Lumpur

Sept 2020 — Jun 2022

- Developed and designed a scalable e-commerce website using Shopify for Lulla, an online retail store specializing in premium clothing, ensuring a responsive and user-friendly interface across all devices.
- Utilized Shopify as the base platform to build a fully functional and responsive e-commerce website.
- Customized Shopify themes using HTML, CSS, and Liquid, optimizing the visual and functional design to align with Lulla's brand identity.
- Integrated various plugins for enhanced customer experience and optimized website performance.
- Collaborated with the marketing team to align website design with brand vision and promotional strategies.
- Managed website troubleshooting, regular updates, and long-term maintenance to ensure seamless user experience.
- Optimized website performance, reducing page load time by ~26% through code optimization and image compression, leading to improved site engagement and customer retention.

Data Scientist at Al Rajhi Bank Malaysia, Kuala Lumpur

Oct 2023 — Oct 2024

- Implementing and managing complex ETL processes and workflows using Apache Airflow to ensure data integrity and efficient data processing.
- Utilizing AWS PowerShell for scripting and automation, enhancing cloud operations and system management within AWS environments.
- Developing and maintaining comprehensive reports for various teams, contributing to strategic campaigns and enhancing customer retention through RFM modeling.
- Crafting intuitive dashboards for customer analytics, providing actionable insights and driving business performance.
- Harnessing Python's powerful data manipulation capabilities for ETL processes and report generation, ensuring accuracy and timeliness of deliverables.
- Undertaking meticulous validation of accrued profits, resolving discrepancies, and refining financial accuracy.
- Spearheading the integration of AWS and Oracle databases to mitigate variances and maintain data consistency across platforms.
- Addressing discrepancies in Thought Machine (TM) balance records, enforcing financial data integrity.
- Designing and deploying a new transaction reporting system, increasing transparency and accountability in financial operations.
- Leading the development of a new data pipeline, modernizing and streamlining legacy processes to support the bank's digital transformation initiatives.

Digital Graduate at Al Rajhi Bank Malaysia, Kuala Lumpur

Oct 2022 — Oct 2023

- Thrived in a dynamic, fast-paced environment as part of the Digital Graduate Programme, engaging in diverse projects across the bank's operations.
- Completed a 3-month international assignment with GFT Vietnam, collaborating on cross-border projects and enhancing international stakeholder communication.
- Demonstrated a strong initiative in skills development, proactively engaging in various projects to refine my data science expertise.
- Gained proficiency in the AWS platform, developing, and managing robust cloud-based solutions for data handling and analysis.
- Led the development of multiple reports, transforming raw data into automated, insightful dashboards and models, crucial for strategic decision-making.
- Served as a key liaison for multiple internal teams, facilitating data-driven discussions and aligning project goals with business objectives.

COURSES

Software Engineering Immersive, General Assembly Sydney

Mar 2019 — Jun 2019

INTERNSHIPS

Software Engineer/Data Scientist at Kenanga Investment Bank Bhd, Kuala Lumpur

Jan 2020 — Jul 2020

- Assisted in developing a Quant & AI Trading platform
- Developed trading algorithms using Bloomberg as the base
- Remained proactive while learning and took initiative to achieve the goals of the department
- Modelling to test performance of algorithms

Stock Broker at RHB Bank Berhad , Kuala Lumpur

May 2015 — Jun 2015

- Learnt the basics of stock broking
- Proactive use of Bloomberg daily to give suggestions to the brokers to give ideas of what to trade on the day
- Used the software to trade
