Professional Summary

Technology Director with 15+ years leading engineering organizations across enterprise SaaS, regulated industries, and banking. Engineering degree, Master of Finance, and MBA — a combination that bridges technical depth with financial rigor and business strategy.

Proven record scaling cloud-native platforms on AWS and Azure, directing teams from startup to enterprise scale, and representing technology at the C-suite level. Experienced in multi-tenant B2B SaaS architecture, DevOps transformation, and engineering budget ownership.

Core technical expertise in cloud infrastructure, AWS serverless development, TypeScript/Node.js, software architecture, CI/CD automation, and enterprise platforms, with additional experience in C#/.NET environments.

Core Competencies

Leadership & Management

- Engineering Team Leadership
- Software Development Lifecycle
- Agile/Scrum Methodologies
- Project Management
- Cross-functional Collaboration

Technical Expertise

- Cloud Architecture (AWS, Azure)
- AWS Serverless, DevOps, CI/CD
- TypeScript, Node.js, JavaScript
- Software Architecture, Enterprise Platforms
- C#, .NET, SQL Server

Professional Experience

Director of Engineering

January 2022 – Present

Relish

Lead technology strategy and execution for a multi-tenant enterprise procurement SaaS platform, overseeing software engineering, DevOps, architecture, and QA. Report to the CTO; also served as interim VP of Engineering (February – December 2024), reporting directly to the CEO during a critical growth period.

- Scaled engineering organization through critical growth phases; established architectural standards and development practices for multi-tenant SaaS expansion
- Drove cloud infrastructure cost optimization with direct impact on operational margins
- Implemented CI/CD pipelines, automated testing frameworks, and observability practices across cloud environments
- Managed vendor relationships, engineering budget, and cross-functional alignment with Product, InfoSec, and Customer Support

Technical Environment: Multi-tenant SaaS architecture, cloud infrastructure, JavaScript/TypeScript, CI/CD, automated testing, observability, vendor integrations

Software Engineering Manager

February 2017 – January 2022

Conduent

Led a team of 14 developers and QA specialists on a mission-critical Workers Compensation SaaS platform, with full accountability for delivery, quality, and team performance.

- Directed strategic migration from legacy .NET Web Forms to cloud-native Angular applications on Azure
- Implemented SDLC standards, CI/CD pipelines, and DevOps practices that reduced deployment cycle times across all platform components
- Managed data ingestion pipelines (XML, ANSI X12, PDF), BI reporting (Crystal Reports, SAP Business Objects), and multi-state regulatory compliance systems
- Served as technical liaison translating complex compliance requirements into actionable engineering roadmaps for business stakeholders

Technical Environment: .NET Framework, .NET Core, Angular, Azure DevOps, C#, SQL Server, ANSI X12, Crystal Reports, SAP Business Objects

Business Analyst

April 2015 – February 2017

Conduent

Technical bridge between engineering teams and business stakeholders for Workers Compensation SaaS platforms serving state government compliance reporting across the USA. Acted as technical product owner, defining requirements for compliance-focused solutions, managing delivery priorities, and supporting platform operations across multiple state jurisdictions.

Technical Environment: SQL Server, VB.NET, C#, Team Foundation Services

Senior Software Developer

August 2011 – March 2015

Banco Agromercantil de Guatemala

Progressed from developer to technical lead within 3.5 years, directing a team of 6 on mission-critical enterprise banking systems.

- Led COBOL-to-.NET modernization initiatives and third-party e-Banking integrations
- Delivered ETL solutions for Business Objects BI platform and core banking modules (COBIS)
- Coordinated with Software Architects to establish technical standards; managed project planning (Microsoft Project) and production support

Technical Environment: .NET Framework, C#, SQL Server, COBOL, Business Objects, COBIS

Education

Master of Business Administration

2015 - n/a

ENAE Business School

Master of Finance

2013 - 2015

Universidad Rafael Landívar

Academic Excellence Diploma

Universidad Rafael Landívar

Magna Cum Laude, Excellence in Values Award 2012 - Asociación de Estudiantes de Ingeniería (AEI)

Certifications

Microsoft Certified: Azure Developer Associate | *Microsoft* | *March 2021 - March 2023*

Microsoft Certified: Azure Data Fundamentals | *Microsoft* | *May 2021*

Microsoft Certified: Azure Fundamentals | *Microsoft* | *November 2020*

Duolingo English Test | *Duolingo* | *February 2020 - February 2022*

Open Source Contributions

- **JSON Tree Size** - VS Code extension that visualizes JSON file size by path - interactive tree explorer with size bars, heat-map coloring, and one-click navigation.
- **XML Tree Size** - VS Code extension that visualizes XML and SOAP payload sizes by element, attribute, text, and CDATA in an interactive tree.
- **gitflow-in-azure-devops** - Creator of utility for Azure DevOps Git flow implementation
- **pretix-qpaypro** - Creator of payment processing plugin
- **Pretix** - Collaborator on ticketing platform versions
- **Visual Studio Code** - Spanish translator for multiple versions
