🏆 ACHIEVEMENTS

- ★ Reduced deployment times by 50% through automation of CI/CD pipelines.
- ★ Implemented infrastructure as code, leading to a 30% decrease in provisioning errors.
- ★ Migrated legacy applications to AWS, resulting in a 40% cost savings on infrastructure.

👤 PROFESSIONAL SUMMARY

IT Professional with about 5+ years of experience as a DevOps Engineer, in Infrastructure automation, code migration, Configuration Management, and system administration. Experience in setting up the enterprise infrastructure on Amazon Web Services (AWS). Expertise in AWS, experience in implementing new AWS instances and working with EBS and S3 storage.

💻 WORK EXPERIENCE

DevOps Engineer II

📅 May / 2020–Ongoing

Pineapple Enterprises

📍 Santa Monica, CA

1. Involved in building and configuring Red Hat Linux servers using kick-start server as required for the project.
2. Maintaining maximum uptime and maximum performance capacity for enterprise production, QA, and UAT/staging.
3. Expertise in AWS, experience in implementing new AWS instances and working with EBS and S3 storage, and IAM.
4. Launching and configuring of Amazon EC2 cloud servers using AMIs (Linux/Ubuntu), designed and implemented a scalable, secure cloud architecture based on Amazon Web Services.
5. Setting up the scripts for creation of new snapshots and deletion of old snapshots in S3. Worked on setting up the life cycle policies to back up the data from AWS S3 to AWS Glacier.
6. Supporting an AWS cloud environment with 1000+ AWS instances and configured elastic IP and elastic storage.
7. Cloud and system virtualization platforms and tools (AWS, VMware, Docker, vagrant).

Devops/Sr. Linux System Administrator

📅 May / 2018 – May / 2020

Summit Peak Industries

📍 Denver, CO

1. Setting up new development branches, merging branches, facilitating the releases, setting up the new REPOS, managing the permissions for various git branches creating Adhoc git stashes, created post-commit and pre-push hooks using python in svn and git REPOS setting up the svn and git REPOS for Jenkins build jobs managing the database DDL, DML scripts in svn and git write basic Powershell scripts.
2. Hands-on experience in diagnosing, troubleshooting various networking, hardware & Linux/ Unix server services issues and performing preventive maintenance.

🎓 EDUCATION

Bachelor of Science in Computer Science

📅 May / 2016 – May / 2018

University of Technology

📍 Denver, CO

Focused on software engineering, systems architecture, and network security.
