

Danny Tomawis – DevOps Engineer

Centreville, VA ❖ Clearances: Public Trust (DOJ and DHS), Top Secret/SCI (DoD)

EDUCATION & CERTIFICATIONS & SKILLS

Education: B.S in Information Technology – GMU 2015 – 2019

Certifications: AWS CCP (2022), AWS SAA (2022), Comp Tia Security + (2022)

Programming Languages: PowerShell, Python, Bash, CLI, HTML, XML, BOTO, YAML, JSON

Technology: Windows 10 (Desktop & Server), DHCP, Active Directory, Group Policy, SCCM, BigFix, Beyond Trust, Splunk, Linux, Docker, Kubernetes, AquaSec, Istio, KeyCloak, Vault, Artifactory, Helm

AWS: S3, CloudFront, SNS, Lambdas, IAM, EC2, EKS, Event Bridge, NLB, ALB, RDS

WORK EXPERIENCE

Booz Allen Hamilton

Aug 2022 – Present

DevOps Engineer for FBI | Aug 2022 – Present

Centreville, VA

- Led the migration of Jenkins pipelines to GitLab, optimizing workflow processes.
 - Implemented the deployment of GitLab runners on an AWS EKS cluster using GitLab's Helm charts.
 - Enhancing platform engagement by creating template GitLab CI/CD pipelines for Python, Java Spring Boot, Vue.js, ASP.NET, Node.js, and .NET, simplifying workflows for incoming development teams.
 - Continuously exploring opportunities to improve GitLab CI/CD workflows for app development.
- Created an automation framework to efficiently manage upgrades and the lifecycle of platform app.
 - Developed a standardized process for maintaining up-to-date Docker images.
 - Developed a standardized process for automating automatically updating our platform app services.
 - Developed a web interface for transferring Docker images across different environments.
 - Developed a standardized multi-account deployment for AWS resources using Terraform.
- Incorporating security tools into the CI/CD pipeline to maintain security standards.
 - Utilizing Terrascan to scan Kubernetes and Terraform files for vulnerabilities and compliance issues.
 - Utilizing SonarQube to scan development code for potential bugs and security vulnerabilities.
 - Utilizing AquaSec Trivy to scan Docker containers for vulnerabilities and compliance issues.
- Collaborating with developers to manage and deploy Docker containerized apps within our EKS environment.
- Collaborating with developers to provide AWS infrastructure resources that support their requirements.
- Collaborating with developers to help manage non-containerize apps within our AWS Infrastructure.
- Maintaining the developer's database infrastructure for PostgreSQL, Aurora, and SQL Server.
- Managing AWS infrastructure by continuously improving and implementing security controls.
- Utilizing Big-Fix for deploying VPR patches for windows servers and third-party software patches.
- Utilizing Helm to configure Kubernetes deployments in support of new feature requirements.
- Utilizing Istio, Rancher, and KeyCloak to manage our Kubernetes environment.
- Creating detailed runbooks for technical documentation on deployment processes and procedures.

Leidos

Sept 2020 – Aug 2022

System Administrator for DOJ

Washington, DC

- Provided technical IT support to the Department of Justice (DOJ), ensuring seamless operation of critical systems and infrastructure.

Northern Virginia Park Authority

Sept 2019 – August 2020

System Administrator Jr

Fairfax, VA

- Provided essential support to the IT administrator for the entire NOVA Parks IT Infrastructure.

Northern Virginia Community College

Sept 2013 – Sept 2019

Computer Operation Tech II

Fairfax, VA

- Served as the main system administrator for NOVA's pay to print system.
