

O. OSENI

Summary

Results-driven DevOps and Cloud Platform Engineer with over 7 years of experience designing, implementing, and optimising secure, scalable Azure environments. Proven track record in Azure platform, cloud governance, and leading cross-functional teams through complex digital transformations. Skilled in aligning cloud solutions with organisational strategy, enhancing operational resilience, and fostering a DevOps-driven culture. Adept at stakeholder engagement, incident management, and continuous improvement to drive long-term business value.

Core Competencies

- **Cloud Strategy & Governance:** Azure resource ownership, governance frameworks, technical debt management.
 - **Azure Platform Expertise:** Extensive knowledge of Microsoft Azure offering, PaaS and IaaS: Virtual Machine, App Service, Service Fabric, Azure DevOps, Microsoft Entra ID.
 - **DevOps & Automation:** CI/CD pipelines, Infrastructure as Code (IaC), proactive performance optimisation.
 - **Security & Compliance:** Azure IAM, Azure Defender, Key Vault, Microsoft Entra ID, regulatory compliance.
 - **Incident and Change Management:** Root cause analysis, issue resolution, process documentation.
-

Professional Experience

AXA UK

Platform Engineer (DevOps Methodology)

August 2017 - Present

- **Migration of critical Azure resources:** Led the migration of three Azure App Service Environments - ASE (with 60+ App Services); Delivered the ASE v2 to ASE v3 migration with zero downtime and rebuilt Azure DevOps release pipelines, boosting deployment throughput 35% and cutting ASE run-rate costs by 40%.
- **Automation & Optimisation:** Authored 200+ reusable Bicep/ARM modules plus KQL-driven dashboards/alerts; slashed manual build effort by 65% and lifted deployment success to 88%.
- **Governance & Compliance:** Integrated Payment Card Industry (PCI) compliance controls, boosting security compliance from 67% to 98.9%.
- **Cloud Transformation:** Migrated 50+ on-prem Apps to Azure IaaS/PaaS 2 months ahead of plan: unlocking self-service releases.
- **DevOps Infrastructure Ownership:** Owned and administered all Azure DevOps Build and Release agent pools, ensuring secure, scalable execution environments for 200+ CI/CD pipelines; implemented maintenance, scaling policies, and optimised agent allocation to reduce build wait times by 40%.
- **Security Integration:** Integrated CheckMarx into build and release workflows to embed security and enable policy-based governance into the DevOps lifecycle

- **Cross-Functional collaborations:** Collaborated with security, compliance, and infrastructure teams to integrate cloud platforms into broader enterprise architecture.
- **Mentorship:** Mentored junior engineers and championed knowledge sharing within engineering guilds.

St George's College

Network Analyst. (Network Administrator)

October 2014 - August 2017

- Safeguarded and optimised a college-wide network and datacentre estate during a major digital learning rollout to over 2,000 users with 99.9% network uptime.
 - Drove uptime by hardening firewalls, SAN storage and Microsoft Server clusters, cutting major incidents by 35%.
 - Automated monitoring and alerting (SNMP) to surface issues early, slashing mean-time-to-resolution from hours to less than 30 minutes.
 - Revamped AD/GPO for over 2000 users, improving security compliance and audit scores by 20%.
-

Education

- **MSc in Computer Science** (Software Engineering), University of Staffordshire
- **Diploma in Computer Science**, Lagos City Computer College

Certifications

- **Microsoft Certified: Azure DevOps Engineer Expert** - *Issued Apr 2022, Expires Apr 2026*
 - **Microsoft Certified: Azure Security Engineer Associate** - *Issued May 2021, Expires May 2026*
 - **Microsoft Certified: Azure Administrator Associate** - *Issued Mar 2021, Expires Mar 2026*
 - **CompTIA Linux+ Certification** - *Issued May 2019, No Expiry*
