DEVSECOPS / KUBERNETES / CLOUD NATIVE

PROFILE

I am a passionate DevOps engineer with thorough hands-on experience in building, testing and running applications at global scale.

With more than 16 years of IT experience, I specialise on assisting companies to implement DevOps, infrastructure as code and automated pipelines as well also as migrating to the Cloud.

I am currently providing consultancy services via my own venture: **CLVR**, focusing on containerised workloads, devops and cloud native technologies.

SKILLS

DevSecOps

Networking

Containers & Kubernetes

Leadership and Management
