

Chris Dolphin

dolphin@likethemammal.com • Seattle, WA • chrisdolphin.dev

Frontend Architect and Creative Developer with advanced experience building large-scale Javascript apps on remote teams. I specialize in crafting immersive experiences with polished, intentional UX.

Professional:

Brave Horizons (remote)

An indie game studio crafting a cross-platform 4X strategy game delivered on PC and console, that utilized the Gameface to deploy an HTML interface within Unreal.

Head of UI/UX

July '25 - Present

- Worked with the Game Director to develop the entire UX of the game experience, designing scalable UX systems in **Figma** that ensure parity across PC, Xbox, and PlayStation.
- Architected the frontend codebase to work with **Unreal Engine** and **Gameface**, using tools like Tailwind to scale across all platforms.
- Developed **ESLint** plugins, CI systems, design systems and a component library that standardizes player-facing experiences and accelerated work with other team members.

Napster AI (remote)

Napster AI (formerly Infinite Reality) develops open-source AI-powered platforms and immersive VR/3D experiences across desktop and mobile for clients like Google and Warner Studios.

Frontend Lead

April '25 - Jun '25

- Lead the frontend team in developing a **React**, **Tailwind**, **pnpm** monorepo, establishing coding standards and review processes.
- Contributed to an open-source **WebGL** game engine along with 20+ other developers, including physics, VR, particle effects, and multiplayer for PC, iPhone, and Android.
- Worked with PMs and Designers to develop processes for implementing changes across projects uniformly.

ForFunLabs, ElevenVR (remote)

Principal Frontend Engineer

Nov '22 - Jan '24

- Developed a full featured eSports league site, with a 1.5 million user leaderboard, tools for VR players, and tournament software featuring 3D **react-three-fiber** components.

- Analyzed and reviewed **Google Analytics** data, identifying key insights that informed design and improved performance.
- Set up **AWS S3** deployments for **Next.js** and **Storybook** apps, optimizing development workflow and internal QA processes, and ensuring efficient production delivery.

LIV Inc. (remote)

Frontend Lead / UX Design

Sept '19 - July '21

- Coordinated with the 3D artist and Visual Designer to create compelling interactive web experiences.
- Developed VR prototyping tools with **react-three-fiber** and **drei**, for quick presentation and experimentation.
- Worked with the marketing team to implement a brand redesign and develop pages for new product launches.

Codementor (remote)

Mentor

Nov '17 - Present

- Helped mentees without technical backgrounds create a learning path with the least resistance while overcoming the reality of their goals.
- Built prototypes using **React Native** and **Matter.js**. Debugged **Three.js** effects, CSS Animation quirks, and React component sprawl.
- Guided beginners through common patterns (and anti-patterns) in data management, game design, and performance optimization.

Peerfit Inc. (remote)

Technical Director

Nov '16 - May '17

- Understood the evolution of the product and orchestrated the re-architecture of the entire platform, both backend and front-end codebases, needed to scale the product nationwide.
- Coordinated with the team to diagram and create a new architecture with a **React**, **Redux**, and **Webpack** frontend, and a REST API, Docker, and Kubernetes backend.
- Addressed niche usability, performance, and architecture issues like server-side rendering, routing, browser history manipulation, and architecture refactoring.

Product Team Lead, Fullstack Developer

Mar '15 - Nov '16

- Led the development and maintenance of the product by remotely coordinating a team of developers, designers, and QA.
- Worked directly with the Lead Designer, focusing on crafting a practical user experience. Considering options outside traditional design patterns.

- Onboarded every member of the product team, walking them through diagrams and codebase architecture individually.
- Kept an eye on the shifts in the team's mentality, checking for frustrations, miscommunications, bottlenecks, and tipping points.

Fullstack Developer

Nov '14 - Mar '15

- Migrated the codebase from PHP templates to a Javascript web app using React and **Flux** to manage state, with a **Node.js** build process using **AMD** modules.
- Automated the deployment of custom QA staging environments using **web hooks** and **Gitlab CI**.
- Constructed a RPC architecture for consistent AJAX calls and preloading page data.

Plex Media Player (remote)

Javascript Developer

June '14 - Oct '14

- Maintained a **Backbone** and **Marionette** media player app with several other remote developers, using **Grunt** throughout the workflow.
- Fixed specific browser bugs on iOS and Android using Chrome DevTools remote debugging.
- Built a media player prototype for Chromecast while working within the limits of the technology.

Grooveshark

Frontend Developer

Apr '13 - May '14

Web Development Intern

Feb '13 - Apr '13

University of Florida, BEBR

Web Developer

Jan '13 - June '13

Community:

- Founder of the Eugene Overwatch League Meetup. Apr '18 - Dec '19
- Community Redevelopment Agency (CRA) Board member. Mar '16 - Sept '17
- Founder of "Connected GNV", a local internet quality initiative. Oct '16 - Mar '17

Education:

A. A., University of Florida, Gainesville, FL, 2012
