PROJECTS

- Design a Real-time Landslide Detection and Alerting System for Early Warning
Role : Team Leader
Developed a real-time landslide alerting system using MEMS and moisture sensors to predict landslide likelihood. Successfully demonstrated the system's effectiveness in detecting precursors and providing early warnings.
- Accident Prevention System At Hairpin Bend
Role : Team Leader
Designed a system to alert drivers of approaching vehicles at hairpin bends reducing accident risk. Utilized IR sensors to detect vehicles and generate traffic warning signals.
