PROFILE

Experienced Fullstack developer and a Team lead, a huge tech enthusiast, and a big fan of emerging technologies on the web with 8+ years of professional experience. Full of enthusiasm, big believer of smart work over hard work.

SKILLS

Frontend technologies

HTML, CSS3, Shopify, React, NextJS, React-Redux, React Material design, GatsbyJS, Websockets

Backend Technologies

NodeJS, NestJS, ExpressJS, Apache Kafka, Redis, Microservices

Cloud Technologies

AWS, Kubernetes, Docker

CI/CD Tools

Github, Github Actions, CircleCI, Bitbucket, Gitlab

PROFESSIONAL EXPERIENCE

Senior Engineer & Team lead

01/2024 – present | Ahmedabad, India

DXFactor Solutions 

Client: Porsche & Sensigo  - AI driven vehicle service platform for service technicians and OEMs.

Tech stack: NextJS 14, NodeJS, GraphQL, Postgres, Microservices, AWS

- Developed a diagnostic service which handled core functionality such as parsing an XML file & showing vehicle analysis to the technician for further repair process at scale.
- Redesigned database and enhanced system architecture, evolving it from a proof of concept to an enterprise-grade solution.
- Single-handedly transformed a standard application into a multi-tenant architecture.
- Directed a team of five engineers to ensure superior product quality and optimize user experience.

Senior engineer & Team Lead

05/2021 – 01/2024 | Delhi - Remote, India

Vertrical GMBH 

Highly involved in the development of a SAAS healthcare platform tailored for enterprise clients, aimed at transforming the healthcare industry. Collaborating with esteemed partners like Johnson & Johnson, United Health Global and numerous other industry leaders.

Highlights:

- **Skillset:** Advanced in the MERN stack, TypeScript technology stack and containerized environments, with over 6 years of experience in building web applications. Adept at handling complexities with ease.
- **Design Contribution:** Responsible for designing architecture of Nodejs microservices, integration with databases, cloud services & numerous third party vendors. Overseeing CI/CD pipelines for automatic deployment on various environments.

- **Engineering Team Leadership:** Managed and lead team of 7 super engineers to build a an ecommerce platform generating 1M\$+ in revenue.
- **Strategic Collaboration:** Engage in frontend & backend development and collaborate with product managers, designers, QA engineers and deliver high-quality solutions.
- **Code Quality Enhancement:** Led initiatives to improve code quality, maintainability, and performance by introducing best practices, code reviews, and automated testing.
- **Experience in Remote Setup:** Communicate effectively with team members from different geographies and stakeholders, fostering collaboration in a distributed work setting.

Recent project for enterprise clients:

Medlify  - Medlify is a health services and innovation company on a mission to help people live healthier lives and to help make the health system work better for everyone. Average daily traffic more than 100k+ visitors.

Tech stack: *Shopify*, MERN stack, TypeScript, Apache Kafka, PostgreSQL, AWS, Docker, K8s

Building Complex Applications:

- Successfully undertook the development of complex applications, showcasing a strong problem-solving mindset and the ability to manage intricate technical challenges.

Contribution to Architecture and Design Patterns:

- Led the architectural design of large-scale applications, contributing to robust and scalable systems capable of handling over 10,000 users or serving enterprise-level needs.
- Implemented industry-leading design patterns to optimize code structure, maintainability, and scalability.

Experience in Early Stage Product Setup:

- Played a pivotal role in an early-stage product setup, collaborating closely with an engineering leader to shape the technical vision and lay the foundation for future growth.
- Provided technical insights and contributed to key decision-making processes, ensuring alignment with the product roadmap.

Containerization and Deployment:

- Applied containerization techniques to enhance deployment processes, ensuring efficient and consistent application delivery in containerized environments.
- Utilized tools such as Docker to encapsulate applications, streamlining deployment and improving scalability.

Creating Reusable Components and Codebase Integrity:

- Developed reusable components for both frontend and backend systems, fostering codebase integrity and promoting consistent coding standards.
- Implemented best practices for code organization and maintenance in large codebases, enhancing collaboration and reducing technical debt.

Contributions to Frontend and Backend Systems:

- Collaborated closely with product managers, designers, and QA engineers to deliver end-to-end solutions, contributing to both frontend and backend components of the application.
- Worked proactively with engineering stakeholders to align technical implementations with product requirements and user experience goals.

Senior Software Engineer

01/2021 – 04/2021 | Pune, Maharashtra, India

BuzzyBrains Software Pvt Ltd 

Project: Msmex - Education & Advisory Platform (website )

Tech stack: MERN, TypeScript, AWS, Docker, Bitbucket, Redis, K8s.

- Migrated all media content from an unstable cloud service provider to AWS S3 bucket followed by updating references in DB.
- Integrated end to end lifecycle of capturing payments using Razorpay payment gateway to process order and webhooks to store order details.
- Built a feature to send OTP for login based on multiple SMS vendors and verify it using Redis cache.

- Used lazy loading techniques to improve page loading time.
- Used AWS Cloudfront for static assets like CSS, fonts, JS libraries.
- Used analytics plugin to log user activity.
- Improved CI-CD build time from 13 minutes to 4 minutes by writing efficient docker files.
- Added feature to dynamically populate SEO meta tags on each page by querying backend.

Software Developer

09/2019 – 01/2021 | Ahmedabad, India

Technostacks Infotech Pvt Ltd [↗](#)

Projects: Various projects

Tech stack: PHP5+, Laravel, JavaScript, NodeJS, AWS, MySQL, MongoDB, Redis, Websockets

- Developed fully functional ecommerce website with multiple roles like customer, sales manager, store owner, staff, inventory manager, warehouse manager, admin, super admin, customer service.
- Experience working on Laravel 5.5 and above, YII and CakePHP.
- Implemented complex features using core concepts of Laravel such as Routing, Views, Eloquent ORM, Controllers, Middleware, Models & Migrations, Requests, and Responses.
- Used task scheduling extensively on various projects for background jobs.

PHP Developer

03/2017 – 08/2019 | Ahmedabad, India

Login Infocom Pvt Ltd [↗](#)

Project: E-commerce website

Tech stack: PHP5, Laravel, JavaScript, jQuery

- Integrated Linnworks API to track live stock for products in the inventory across warehouses in USA, UK & UAE.
- Built an accounting module in Laravel 5 to fetch live balance on Pay Pal account from 23 accounts using its SDK.
- Enhanced features in **sales module** to manage products & its details on eBay & Amazon as well as fetching sales count for each product from these sites.

EDUCATION

Bachelor of Science in Information Technology

09/2012 – 06/2015 | Ahmedabad, India

Ganpat University

Grade 12

2011 – 2012 | Ahmedabad, India

Shree Narayana Guru Vidyalaya

Grade 10

2009 – 2010 | Ahmedabad, India

Shree Narayana Guru Vidyalaya
