Blitar, Indonesia

As a Full- Stack Developer with multi years of experience building production APIs in Laravel and Node.js and managing MySQL/ PostgreSQL. Delivered a Parking Management System (resource optimization), a KOL Management System (streamlined influencer workflows), an HRIS (end-to-end employee data), and a Tourist Data System (visitor metrics & hotel operations) using Laravel, Inertia, and React/Vue. Strong in end-to-end delivery and cross-functional collaboration, aligning technical solutions with business goals while prioritizing scalability, performance, and maintainability.

Work Experiences

Remote Worker - Indonesia

May 2025 - Present

Fullstack Developer

- Responsible with the team to develop Tourist Data System using Laravel, Inertia, Vue (Bootstrap) and MySQL database to track visitor origins and transport modes, manage hotel capacity/inventory, and generate employment statistics
- Developed HRIS system with Laravel, Inertia, React (IntentUI) and PostgreSQL to manage employee records, internal mailing, power a job portal, and run candidate assessments.

5758 Creative Lab - Jakarta, Indonesia

Dec 2024 - May 2025

Fullstack Developer

Established in 2021, 5758 Creative Lab has swiftly risen to prominence within the Indonesian marketing landscape, continuously striving for improvement in an industry that rushes.

- Collaborated with the team to design and implement the KOL Management System leveraging Laravel Inertia and React to streamline and operationalize the 5758 Creative Lab
- The KOL Management System enables 5758 Creative Lab to oversee collaborations with Key Opinion Leaders, recording all transaction details budgets, cooperation lists, and agreements to ensure accurate tracking and transparency.

Metrotech Digital Asia - Makassar, Indonesia

Mar 2023 - Oct 2024

Laravel & Backend Developer

Founded in 2018 as a web consulting agency, Metrotech Digital Asia was evolving to be a digital boutique solutions. Where we figured out that we are more than just a digital solutions agency; we are your partners in innovation. What binds us is our passion to create things that not only look impressive but work really good as well.

- Delivered a CMS for Perumda Parkir Makassar Raya, streamlining operations across 50+ sites for 100+ stakeholders.
- Shipped attendance, mailing, field-ops, and deposit-monitoring modules; exposed real-time APIs (Laravel + Passport).
- Implemented Spatie Permission for 100+ users, improving security and scalability.
- Improved maintainability with the Repository Pattern and scaled the monorepo using Turborepo.
- Built Express.js/TypeScript APIs with Prisma for blockchain-based certificate verification and document tracing; secured endpoints with JWT.

Education Level

Politeknik Negeri Malang - Malang, Indonesia

Sep 2020 - Aug 2024

Bachelor of Business Information System, 3.86/4.00

- Awarded incentive by Indonesia's Ministry of Education & Culture (PKM 2021, Karsa Cipta) for a real-time food booking system reducing queues during COVID-19.
- Finalist, 2024 National Informatics Polytechnic Competition (KMIPN VI) — Hackathon.

Organisational Experience

Workshop Riset Informatika - Malang, Indonesia

Jan 2022 - Jan 2023

Deputy Head of Miniclass Website Division

Workshop Riset Informatika (WRI) is a platform for students of the Information Technology Department at Politeknik Negeri Malang, established in 2012 to develop knowledge and expertise in the field of IT.

- Designed and delivered a semester-long web development mini-class; mentored 10–20 students on fundamentals and project workflows.
- Led a team project to build an attendance system for WRI mini-class activities.
- Contributed to 2022 e-voting systems for the IT Student Association and WRI General Chairman elections.
