- English (Fluent)

INTEREST

Security-conscious Design

Interest in security-first design principles and web application development

PROFILE

I am a Full-stack Developer with over 5 years of experience in building and scaling web applications. My expertise lies in utilising React, Node.js, and SQL databases, as well as modern ORMs such as Drizzle. I excel at creating maintainable, scalable solutions and thrive in collaborative, agile environments. My passion for developing quality applications drives me to improve my skills continuously

WORK EXPERIENCE

Mobilise 2024
Frontend Developer (Contract)

- Designed and developed frontend applications using React, Next.js, and TypeScript, with emphasis on performance and scalability
- Collaborated via GitHub and GitLab, leading PR reviews and ensuring high code quality
- Delivered SaaS features including authentication, subscription handling, and secure data flows

Chopwell 2024 - 2025
Fullstack Web Development

- Designed and developed an e-commerce food ordering platform using Next.js for a modern, responsive frontend experience.
- Implemented TailwindCSS and DaisyUI to build a clean, accessible, and mobile-friendly user interface.
- Integrated MongoDB for dynamic product management, order tracking, and secure customer data handling.
- Built RESTful APIs to handle authentication, cart management, and checkout workflows.
- Optimized performance and SEO with Next.js SSR/ISR, improving load times and discoverability.
- Delivered scalable architecture to support future feature expansions, such as payments and delivery tracking.

Osmar Enterprise 2025
FullStack developer

- Built a cross-platform mobile application using React Native, delivering a smooth and responsive user experience on both Android and iOS.
- Developed the backend with Next.js, leveraging API routes for authentication, data management, and business logic.
- Integrated Drizzle ORM with a SQL database to ensure efficient, type-safe queries and maintainable schema migrations.
- Implemented secure user authentication and real-time data synchronisation between the app and backend.
- Collaborated with stakeholders to refine requirements and deliver features aligned with business goals.
