Amravati, Maharashtra

Summary

FullStack web developer interested in making easy to use and accessible websites and making the internet a better place for everyone.

Skills

ReactJS • Redux • NodeJS • GraphQL • NextJS • TypeScript • JavaScript • Python • Django • PostgreSQL • TypeORM

Work Experience

Proficient Test Prep, Software Engineer Intern

12 months from 2019 to 2021 - Amravati, MH

- Collaborated with designers to build intuitive layouts.
- Developed and maintained two Django apps.
- Reduced development time by refactoring components to maximise reusability.
- Added more customizability to the apps and made them more generic.

Projects

FullStack Twitter Clone - [Link](#), [Github](#)

Fullstack web app built using ReactJS, ExpressJS, Sequelize ORM and TailwindCSS.

Uses JSONwebtoken in localStorage for authentication. Allows creating, deleting, bookmarking and viewing posts.

Portfolio Website - [Link](#), [Github](#)

Website built using NextJS, Styled Components and uses Storyblok CMS. Uses intersection observer api to display text on scroll and uses stroke offset and stroke dash array to animate svgs.

FullStack Tumblr Clone - [Link](#), [Github](#)

PERN stack web app built using NextJS, Apollo-GraphQL, TypeORM and TailwindCSS.

Uses JSONwebtoken and cookies for authentication. Allows creating, liking, deleting and viewing posts.
