ABOUT ME

I focus on building robust, scalable, and intuitive applications using React.js, Next.js, and TypeScript.

My approach prioritizes code quality, clean architecture, and long-term maintainability.

I manage merge requests with precision, implement functional testing, and ensure alignment with clean code principles. Collaboration is a cornerstone of my work, engaging with technical, product, and design teams to make impactful decisions.

EDUCATION

ENSEA French Software Engineering Diploma ~ 2014-2017

UWO International Exchange Program ~ 2017-2018

WORK EXPERIENCE

Lead Frontend Developer

@ Blank / 2021 - 2024

Built scalable banking applications for Blank, including white-label solutions for Crédit Agricole and LCL.

Oversaw both the build and run phases to ensure seamless delivery and operation.

Ensured code quality with E2E testing, clean practices, and precise merge request management. Led team growth and cross-functional collaboration.

Fullstack Developer

@ Thales Digital Factory / 2019 - 2021

Developed web application MVPs for Thales' digital transformation. Worked on frontend (Angular, React.js) and backend (Java Spring Boot). Optimized internal processes using the Thales Digital Platform.

Frontend Developer

@ General Electric / 2018

Developed web apps for monitoring GE steam turbines with GE Predix. Integrated Internet of Things solutions into industrial systems. Achieved high distinction for results.
