Gameplay programmer with a diverse set of programming skills and game development experiences, gained by communicating and working together with multi-disciplinary teams. Eager to learn, agile, and a team player. Excited to implement new game systems, features, and development tools with a focus on maintainable and modular code.

Competencies

- Proficient in C++ and C#
- Professional communication
- Responsible and pro-active
- Dedicated team member
- Eager to learn and try new things
- Inclusive and mindful of others

Work History

2021-09 -

Gameplay Programmer

Current

Massive Entertainment - A Ubisoft Studio – Avatar: Frontiers of Pandora, Malmö

- Ownership over many key gameplay systems and features such as cooking, crafting, weapon wheel, and journal. Being responsible of implementing their functionality and evolved systems to higher standards. Also assisting with the implementation of many smaller features across Avatar: Frontiers of Pandora.
- Collaborated daily with cross-disciplinary team to discuss problems and worked very closely with dedicated team members to deliver features to set product goals, adapting rapidly where it was needed.
- Delivered code according to high quality standards set for the in-house Snowdrop engine and provided and acted upon code feedback.
- Polished delivered title through debugging and profiling across multiple target platforms, utilizing both PlayStation and Xbox newest hardware and SDKs to deliver to quality expectations.
- Ensured that all contributions made by myself were following and meeting criteria set by stakeholders and license owner.
- Shipped the title from production to release, following the right priorities set by the production team and ensuring those were met to satisfaction.

2020-09 -

C++ Gameplay Programmer

2021-06

Triumph Studios - Internship - Age of Wonders 4, Delft

- Implemented new gameplay systems and features using the custom in-house engine pipeline while working closely together with many designers and artists.
- Major contributor of porting existing interfaces from the legacy UI system to the Noesis GUI pipeline and creating new gameplay interfaces from scratch
- Due to my own interest in game architecture, I supported the custom engine development by extended Noesis Pipeline and writing command-line tools.

Education

2017-08 - 2021-07	Bachelor of Science: International Game Architecture & Design Breda University of Applied Sciences - Breda, The Netherlands
2012-09 - 2016-01	Associate of Science: Game Developer ROC A12 Media & ICT - Ede, The Netherlands

Personal Information

During my spare time I love to explore what Europe and the world has to offer. I like being creative with my skills and so I participate in game jams and create smaller games. I do like my fair share of games, both on PC and console as well as having social boardgame sessions. Health is also important to me, so I regularly work out and go running or swimming for my enjoyment and to become better person today!
