SUMMARY

AI & MLOps Engineer with 3+ years of experience driving the research, development, and production deployment of intelligent systems. Expertise in orchestrating ML models, NLP, and LLMs (including RAG architectures), with a proven track record of designing highly scalable MLOps ecosystems. Adept at transforming isolated experimental models into robust, real-world solutions through cross-disciplinary collaboration and technical leadership.

EXPERIENCE

Freelance/Avocation IT/ML Developer Jan 2025 - Present

External Contributor/Reviewer, Dicoding Indonesia Jun 2024 - Present

- Evaluated an extensive volume of learner projects across the Machine Learning and Data Science paths, providing comprehensive, code-level feedback, from basic to advanced levels.
- Consistently achieved high-performance ratings as an Advisor, Instructor, and Mentor in Dicoding Program such as Bangkit, LaskarAi, and CodingCamp.

MLOps Architect Associate, Research UNNES & PT Global Data Inspirasi Aug 2024 - Des 2024

- Architected a containerized MLOps platform for the SPARKA system, transitioning isolated models into a fully deployable, production-ready architecture that ensures high scalability and concurrent access through a decoupled design utilizing gRPC and Kafka

Tech Lead Associate, Kedaireka 2023 Project PT Global Data Inspirasi Aug 2023 - Jan 2024

- Led the end-to-end technical development of a smart tourism product, designing a scalable ecosystem that seamlessly integrated artificial intelligence, robotics, and web-based systems to deliver an interactive visitor experience and data-driven operational insight.

ML Solution Engineer, Intern PT Global Data Inspirasi Feb 2023 - Jul 2023

- Engineered an end-to-end AI pipeline, pairing real-time computer vision models with low-latency backend APIs to deliver seamless age, gender, and emotion analytics for Smart Tourism

IoT Engineer and Technician, Intern PT Best Garment Aug 2022 - Dec 2022

Intelligence Robotics Research Assistant Jan 2022 - Dec 2022

EDUCATION

Bachelor of Engineering with Yudicium Cumlaude Aug 2020 - Oct 2024

Universitas Negeri Semarang

- Major in Electrical Engineering with GPA 3,63
 - Thesis on "A Comparative Study Of Modern Activation Functions On Multi-Label CNNs To Predict Genres Based On Movie Posters".
-

ADDITIONAL INFORMATION

- **Technical Skills:** ML Research, ML Pipeline & Operations, Data Science, LLM, RAG, LangChain, Vector Databases, Advanced PyTorch & Tensorflow, Google Cloud Platform
- **Intellectual Property Rights:** Reverse Parking Alarm System, Post Stroke Patient Rehabilitation Application Based On Pose Detection
- **Certifications:** 70+ Dicoding certification in various technology
- **Awards/Activities:** Achieved finalist and champion titles in various university and institutional competitions, while actively engaging in research group and publishing multiple ML research papers. Also, designed various proposals and presentation for funding acquisition.
