

Joseph Mulray

(610)-368-8567 | github.com/joemulray | www.mulray.info | joe.mulray@gmail.com

Technical Skills

- Programming Languages: Python, Java, MySQL, Bash Scripting
- Operating Systems: Linux, MacOS, OpenWrt
- Frameworks and Tools: Flask, Git, Ansible, CloudFormation

Experience

Systems Development Engineer
Amazon Web Services

Greater Washington DC Area
August 2019 - Present

- Designed and implemented a banner alert system using RDS and Flask-Bootstrap
- Wrote integration tests for internal services using Moto and Pytest
- Enforced authentication and ownership for API endpoints for a service
- Created Clouwatch alarms and dashboards for a service using CloudFormation

IoT Engineer
machineQ

Philadelphia, PA
Sept 2018 - Aug 2019

- Created and built software images for machineQ LoRaWan Gateways
- Manage and deploy software packages and releases via OTA updates
- Developed REST APIs to manage and push gateway configurations in Lua and Flask
- Fixed network and software issues on an OpenWrt environment

Software/DevOps Engineer
machineQ

Philadelphia, PA
April 2018 - Sept 2018

- Created GUI for the Gateway Testing Framework using Bootstrap and Jinja
- Developed a utility tool to upgrade and test Gateways using Ansible
- Wrote scripts to connect and monitor Gateways Wifi status in Lua
- Fixed bugs in Gateway operating system and internal application tools

Software Engineer
SAP America

Philadelphia, PA
March 2017 - Sept 2017

- Created VBScripts to test SAP software and systems
- Developed application using SAPUI5 on Fiori Launchpad
- Created Java REST API using Jersey and Hana Cloud Platform Backend
- Designed a schema to track version control for stored review forms

Software Developer
Comcast

Greater Philadelphia Area, PA
March 2016 - Sept 2016

- Fixed bugs on existing web applications in AngularJS
- Created a Python script to flag upcoming tickets with missing impacted network towers
- Updated feeder engine in Python to post correct payload of outgoing scheduled incident tickets
- Integrated search functionality to retrieve and populate customer data tailored to user input

Projects

VyB

Drexel Senior Design Project
Sept 2018 - July 2019

- Developed a real-time rating application using React Native and AWS Services
- Led a team of six developers to distribute roles and tasks using JIRA/Trello
- Designed and implemented a RDBMS in MySQL for storing and processing reviews
- Developed continuous integration to build React Native binaries using TravisCI

Certifications

- AWS Certified Solutions Architect - Associate
Sept 2019 - Sept 2022
- AWS Certified Cloud Practitioner
Sept 2019 - Sept 2022

Education

Drexel University

Philadelphia, PA

- Bachelor of Science in Software Engineering
- Cumulative GPA: 3.31
