Professional Summary

MERN Stack Developer focused on building fast, responsive web applications with React, Tailwind CSS, Node/Express, and MongoDB. Shipped production features end-to-end—from REST API design to polished UI—with an eye for performance, accessibility, and clean component abstractions. Comfortable collaborating in sprints, writing clear PRs, and deploying to Vercel/Netlify.

Skills

Frontend: React, React Hooks, Tailwind CSS, JavaScript (ES6+), HTML5, CSS3
Backend: Node.js, Express.js, REST APIs, JWT/Auth

Database: MongoDB, MySQL (basics), Indexing
Tools: Git/GitHub, Postman, Vercel/Netlify, VS Code

Professional Experience

MERN Stack Developer — Landing Labs Pvt. Ltd., Pune (*Jul 2025 – Present*)

- Contributed to the main company website during the development phase—owning sections of the homepage and shared components using React.js and Tailwind CSS.
- Implemented and integrated REST APIs (Node.js/Express.js) and coordinated with backend peers for data contracts and error handling.
- Optimized UI performance and responsiveness; refactored components into reusable hooks to speed up feature delivery.
- Supported deployments to Vercel/Netlify and assisted in basic CI steps (build verification, env config).

Selected Projects

1. SideNest (Company Project) — side-nest.vercel.app

Technology: React.js, Tailwind CSS, Node.js, Express.js, MongoDB, Vercel, Netlify

Developed a platform to help users turn concepts into actionable projects. Led frontend,

integrated backend; frontend deployed on Vercel and backend on Netlify.

- Built clean, responsive UI with React.js and Tailwind CSS.
- Created Node.js/Express.js APIs; connected to MongoDB for data persistence.
- Implemented navigation, state handling, and reusable components for rapid iteration.

2. KHAF-Fulfillment (3PL Platform) — khaffulfillment.com

Technology: MongoDB, Express.js, React.js, Node.js, Tailwind CSS

Full-stack MERN application for a logistics company with an interactive dashboard for order management and tracking.

- Built & integrated backend APIs with Node.js/Express.js for real-time updates to the React front-end.
- Designed order list views, filters, and status widgets with responsive layouts.

3. Makeover By Leena — makeover2.vercel.app

Technology: React.js, Tailwind CSS, Vercel

Professional makeover & beauty services site with modern UI/UX and responsive layout.

- Implemented gallery and booking-ready sections using reusable components.
- Optimized layout for CLS/LCP to improve perceived performance.

4. 3PL Service Website — (internal demo)

Technology: MERN Stack, REST APIs, Responsive UI

Logistics service portal with interactive dashboards for order management and tracking.

- Integrated backend APIs and ensured smooth data flow to UI components.
- Focused on data presentation and usability for operations teams.
