ABOUT ME

I am MERN Stack Developer. Experienced with all stages of the development cycle for dynamic web projects. Well-versed in numerous programming languages including HTML5, JavaScript, CSS, Bootstrap, Tailwind, React.js, Redux, Node.js, Express, MongoDB. Strong background in project management and customer relations.

EXPERIENCE

Dazzler Software Pvt Ltd

MERN Web Developer (Internship)

Designing and developing responsive websites, Projects focusing on smooth user experience, implementing and working on some CSS frameworks like Tailwind, Bootstrap and Material UI.

Learned to create single page web applications.

Build frontend projects using React and Redux toolkit using data from the API of backend live servers.

Worked under a team to create a new web application, increasing user engagement.

Proficient in frontend technologies such as HTML, CSS, and JavaScript.

Experience in designing and developing RESTful APIs using Node.js and Express.js.

Experience in developing and maintaining web applications using MERN Stack (MongoDB, Express.js, React.js, Node.js).

PROJECTS

1. LIVE WEATHER APP

- Live search Weather app using React functional components, React Hook, React fetch API.

2. PORTFOLIO

- As a skilled React frontend developer, my portfolio showcases my expertise in creating engaging and interactive user interfaces. My portfolio highlights my dedication to creating cutting-edge web applications.

3. FOOD ORDERING APP

- It is a Node.js project for realtime pizza tracking web app. UI is created with EJS using Node.js.

4. FLIPKART CLONE APP

- I developed a fully responsive Flipkart clone using React for frontend and Node.js for backend. Utilizing Material UI for CSS.

5. SPOTIFY MUSIC APP

- I developed a Spotify music app using vanilla JavaScript, utilizing a custom JSON file as the data source. The application features essential controls like play/pause buttons, volume rockers.
