SUMMARY

Full-Stack Developer with hands-on experience building and scaling **production-grade web platforms** across **FinTech**, **PropTech**, and **SaaS domains**. Proven expertise in developing **secure payment workflows**, **multi-step transactional systems**, and **SEO-optimized, high-performance web applications** using **Next.js 16**, **React 19**, **TypeScript**, and **Node.js**. Strong background in **technical SEO**, **server-side rendering (SSR)**, **API design**, **authentication & authorization**, **database modeling**, and **application security**. Known for writing clean, scalable code, building reusable UI systems, and delivering reliable solutions in fast-paced, production environments.

EDUCATION

Parul Institute of Technology

B.Tech. in Computer Science and Engineering, CGPA: 7.8

Vadodara, Gujarat

Sep. 2021 – July 2025

Ishan International Public School

High School Certification, Percentage: 78%

Patna, Bihar

Apr. 2019 – May 2020

EXPERIENCE

Full-Stack Developer | [Hidden Mind Solutions PropWise](#) , [ScribeShade](#) , [ZibaPay](#)

Sep. 2025 – Present

Hidden Mind Solutions | Multiple Production Platforms

India

- Contributed as a **Full-Stack Developer** to 4+ large-scale production platforms, including the company portfolio website, payment gateway systems, property-tech platforms, and SaaS dashboards
- Designed and developed the **official Hidden Mind Solutions website** as an **end-to-end project owner**, implementing **SEO optimization**, **responsive design**, **Strapi CMS integration**, **dynamic animations with Framer Motion**, and **server-side rendering** for optimal performance
- Designed and implemented **100+ reusable, production-ready UI components** with **Tailwind CSS 4**, **Radix UI**, and **shadcn/ui**, covering **admin panels**, **data tables**, **complex forms**, and **role-based dashboards**
- Built a **multi-step property listing workflow** featuring **form state persistence**, **secure file uploads**, **real-time image previews**, and **transaction-safe media handling** to ensure data consistency across steps
- Implemented **enterprise-grade authentication and authorization systems** using **Google OAuth 2.0**, **JWT access & refresh token rotation**, **OTP verification (WhatsApp/SMS)**, **2FA**, and **role-based access control (RBAC)**
- Engineered **type-safe form pipelines** using **React Hook Form**, **Zod schemas**, and **Swagger OpenAPI**, ensuring strict validation, API consistency, and developer-friendly documentation
- Developed **advanced analytics and reporting dashboards** with **Recharts**, **custom filters**, **date range selectors**, and **real-time KPI monitoring** for business-critical insights
- Designed, developed, and tested **robust RESTful APIs** backed by **PostgreSQL (Prisma)** and **MongoDB (Mongoose)**, supporting **pagination**, **search debouncing**, **transaction-safe operations**, and optimized query performance
- Integrated **secure payment gateway workflows** including **card payments**, **bank transfers**, **KYC verification**, **transaction reconciliation**, and **AES-256 encrypted sensitive data processing**
- Implemented **multi-layer application security** with **rate limiting**, **XSS/SQL injection protection**, **API key authentication**, and **comprehensive audit logging** using **Winston (40+ event types)**
- Containerized and deployed applications using **multi-stage Docker builds**, optimizing image size and runtime performance, and published production-ready images to **Docker Hub**

MERN Stack Developer | [Live Link](#)

Apr. 2024 – Sep. 2025

Websenor Infotech | UGUIDE - Travel & Lifestyle Platform

India

- Developed a **production-ready travel platform** using **Next.js 16 App Router** with **TypeScript** and **server-side rendering (SSR)**

- Implemented **global state management** using **Redux Toolkit** with **Redux Persist** for seamless user session persistence
- Built **responsive, mobile-first UI** with **Tailwind CSS** featuring **dynamic theming** based on city selection
- Integrated **RESTful APIs** using **Axios** with custom **request/response interceptors** for authentication handling
- Built **dynamic blog system** with **rich text rendering**, **related posts**, and **author profiles** using Next.js dynamic routes
- Developed **reusable component library** including carousels, blog layouts, and city-based content filtering systems
- Implemented **SEO optimization** with **dynamic metadata**, **sitemap generation**, and **robots.txt** configuration
- Achieved **40% faster page loads** through **code splitting**, **lazy loading**, and **Next.js image optimization**

MERN Stack Developer Intern

Jan. 2025 – Mar. 2025

Srchout Software

India

- Developed **20+ responsive web pages** using **MERN stack** with optimal performance across all devices
- Integrated **10+ RESTful APIs** for **real-time data processing**, improving user engagement by **25%**
- Built an **intelligent rule-based chatbot** in **JavaScript** to automate customer support and enhance UX
- Engineered **backend services** with **Node.js/Express.js** for secure routing and middleware implementation

PROJECTS

GoHighler - Multi-Vertical Business Platform | *Next.js 16, React 19, Tailwind CSS, Framer Motion*

2025

- Developed **production-ready corporate website** for GOHIGGLER PRIVATE LIMITED, a multi-vertical business spanning **5 strategic industries**
- Engineered **modern, responsive UI** with **Framer Motion animations** and **Tailwind CSS 4** design system for premium user experience
- Implemented **SEO-optimized pages** with Next.js App Router, dynamic routing, and server-side rendering for improved web performance
- Live: gohiggler.com

CreditSea Loan Management System | *React 19, Node.js, Express, TypeScript, MongoDB*

Jul. 2025

- Built **full-stack loan management platform** with **role-based access control** supporting Admin, Verifier, and Applicant workflows
- Developed **RESTful API backend** with **15+ endpoints**, **JWT authentication**, and comprehensive input validation using Express.js and MongoDB
- Implemented **real-time dashboard analytics** with status tracking, loan statistics, and multi-stage application approval workflow
- Live: [View Application](#)

Grocery Express | *React, Express, Node.js, MongoDB*

Jan. 2024 – Mar. 2024

- Developed **full-stack e-commerce platform** with comprehensive **product catalog management** system
- Engineered **optimized shopping cart** and **secure checkout process**
- GitHub: [View Repository](#)

TECHNICAL SKILLS

Frontend	: React 19, Next.js 16, Redux Toolkit, Tailwind CSS 4, Framer Motion, shadcn/ui
Backend	: Node.js, Express.js 5, REST APIs, JWT, OAuth 2.0, Prisma ORM, Mongoose ODM
Database	: MongoDB, PostgreSQL, MySQL, Firebase
DevOps	: Docker, Git, GitHub, Vercel, Render
Tools	: VS Code, Postman, Swagger, Winston, Zod, React Hook Form
