Portfolio: <https://fullstackamber.com>

As a full-MERN-stack developer, I merge together my skills in web-development and my ten plus years in manufacturing to present you with someone who thrives in a time-based goal environment, understands the fine balance between delivering quality verses production guidelines, uses my communication skills to communicate effectively and create a positive influence on all collaborations, and truly enjoys finding an innovative solution to even the smallest of problems. My goal is to continue to learn new skills and become an indispensable member to your organization.

Skills

HTML, CSS, JQuery, Javascript, Typescript, ReactJS, Bootstrap, SASS, Bulma, MySQL, Sequelize, MongoDB, Mongoose, Express, NodeJs, Handlebars, EJS, Webpack, Java, Spring Boot, Rest API design and development, Git, Bash

Projects

Dollars and Bills

Repository https://github.com/Amber-Robeck/Dollars_and_Bills

Deployed <http://dollars-and-bills.herokuapp.com/>

Role in Project: *Front-End/React*

- User friendly budgeting application that allows you to keep track of your dollars while paying your bills.
- This application allows a user-once signed up-to create multiple budgets and expenses within. The application keeps track of total budgets, and expenses and allows a user access to full CRUD for a fantastic user experience.
- Tools/Languages: React, GraphQL, React-Bootstrap, React-chartjs-2, Git

Dungeon Crawler

Repository <https://github.com/Amber-Robeck/Dungeon-Crawler>

Deployed <https://frozen-bayou-97963.herokuapp.com/>

Role in Project: *Frontend/Routes/Handlebars*

- Database for users to store Dungeons and Dragons campaign information.
- This project helps a dungeon master save information for their campaign into the database and easily navigate to the needed information for current gameplay.
- Tools/Languages: MYSQL, Sequelize, Heroku, OldBookCss, Handlebars, Git

Chord Base

Repository <https://github.com/Amber-Robeck/Chord-Base>

Deployed <https://amber-robeck.github.io/Chord-Base/>

Role in Project: *Project manager*

- Guitar application for looking up how to play chords.
- This easy-to-use application allows a user to look up the Chord they want to play and then receive a guitar tab of how to play said chord along with a sound clip of how that chord should sound. Complete with an instructions page this application is perfect for experienced and beginner guitar players alike.
- Tools/Languages: HTML, CSS, Javascript, APIs, Bulma, Git
