London, UK | [+44 7706 584678](tel:+447706584678) | jack@jackfinnis.com | [Portfolio](#) | [LinkedIn](#) | [GitHub](#) | [App Store](#)
First-Class Computer Science Graduate from Imperial College London with 5+ years of experience building apps, 19 published apps, and 30K+ total downloads. Creator of Alive, the interactive AR experience for Apple Vision Pro that turns your living room into an aquarium. [Watch Demo](#)

KEY SKILLS

Mobile App Development: SwiftUI, Flutter, React Native, Kotlin, Jetpack Compose

Web Development: React, Typescript, Next.js, Tailwind, SQL, Python

visionOS Development: SwiftUI, RealityKit, ARKit, System/Component, Shader Graph

EXPERIENCE

Boat Fix, Inc. – Freelance Mobile App Developer Aug 2023 – Present

Designed, developed, and published the Boat Fix Orange mobile app, providing boaters with essential support and safety information. Integrated live NWS weather and tides data to alert boaters of immediate hazards e.g. lightning. Managed the full application lifecycle, from initial concept and iterative UI/UX design through to deployment on [iOS](#) and [Android](#). Used native frameworks including SwiftUI and Jetpack Compose. Upgraded the Boat Fix Pro Flutter app to display your live boat location on NOAA nautical charts for enhanced maritime navigation.

Terra API (YC W21) – Software Engineer Intern Aug – Sep 2023

Redeveloped the Terra API Swift iOS SDK from the ground up, giving developers immediate access to iPhone and Apple Watch health data. Scheduled background tasks to optimally extract 100+ HealthKit data points and simplified the developer setup guide. Integrated new Apple HealthKit data points to the Health API while maintaining compatibility with 50+ other data sources. Solved customer issues live during calls and added SDK features through ongoing customer feedback.

Flipside Group – Mobile App Developer Intern Aug – Sep 2022

Developed a Widget for the Papa John's iOS app, allowing users to track their live pizza order status from their lock screen. Integrated Live Activities while in Beta using SwiftUI, and worked with the team of animators and designers to match PJ branding. Developed an App Clip for Texaco, allowing users to sign up to their rewards program and instantly use their new loyalty card in Apple Wallet. Refined solutions through weekly meetings with the CEO.

EDUCATION

Imperial College London – BEng Computer Science Oct 2022 – June 2025

Grade: First-Class Honours (1st), Overall Mark: 79%

Awarded Student Activity Award for contribution to extra-curricular student societies, including as Musical Theatre Society Webmaster, Drama Society Systems Administrator, Chamber Choir Soloist, and Director of/Lead role in 8 plays including 2 at Edinburgh Fringe Festival.

Eton College – A Level & GCSE Sep 2017 – June 2022

A Level: A*A*A*A* in Maths, Further Maths, Computer Science and Physics. STEP 2: Grade 1.

GCSE: Eleven 9s (A** equivalent) including Computer Science.

As Head of Computer Science Society established weekly tutorials and student project showcases, Academic Scholar (Top 10%), Peer-elected Senior Prefect, Music Exhibitionist, Chapel Choir Soloist, Voice of Eton Radio during Lockdown, Lead role in 5 Plays, Cox of Rowing 3rd VIII.

PROJECTS

Alive AR Experience – Final Year Project

Oct 2024 – Present

Published an interactive AR experience for Apple Vision Pro in which fish swim around your room, spiders crawl up your walls, and butterflies land on your hands. Pioneered realistic creature movement in visionOS using bespoke path planning algorithms including A*, Boids, RRT and DWA that respond to your gestures, surroundings, and movement in real-time. Designed modular SwiftUI-RealityKit-ARKit architecture that minimises latency using Components and Systems. [Watch Demo](#)

Productivity Apps – Personal

Jul 2022 – Present

Published 18 SwiftUI iOS/macOS apps with 30K+ total downloads, including a map of every river in the UK, complex Fourier series visualiser, London Underground status widget, historic London churches map, screen time tracker, app icon maker, meal planner, news reader, and more. Integrated frameworks including MapKit, HealthKit, WebKit, WatchKit, SpriteKit, WidgetKit, CloudKit, SwiftData, Foundation Models (AI), App Intents, Family Controls and more. [View Portfolio](#)

[Swiftlease AI](#) – Startup (Team of 3)

Sep 2025

Built an agentic AI estate agent, allowing renters to find their perfect property without leaving WhatsApp. Integrated WhatsApp Business API to enable real-time multi-modal messaging and developed Next.js webapp for estate agents to recommend properties.

[Astéo AI](#) – Startup (Team of 4)

Mar – Aug 2025

Built an AI-powered recruitment platform specialised for high finance. Developed Next.js webapp for hiring managers using Typescript and React, and architected agentic AI to help them refine their ideal candidate profile and filter applicants using tagging and vector embeddings.

Jack Finnis Art – Greeting Card Business

2016– 2024

Launched my own online art business selling charity greeting cards. Earnt £9,400 revenue and donated all £3,700 profit to charity. Designed cards, sourced materials, built e-commerce website, and advertised at online Christmas fairs.
