As a Mobile App Developer with over a year of experience, I successfully delivered robust and user-friendly applications for both Android and iOS platforms. Collaborating closely with cross-functional teams, I played a key role in the entire development lifecycle, from concept to deployment. My strong foundation in programming languages such as Java, Kotlin, and Swift, coupled with my expertise in UI/UX design, enabled me to create engaging and visually appealing apps that significantly improved user experience. I consistently demonstrated my commitment to quality by conducting thorough testing, debugging, and optimizing the apps, resulting in a final product that met or exceeded client expectations.

Mobile App Developer at Appalachian Apps, KY

Mar 2023 - Present

- Developed a top-ranking e-commerce app for a local business, resulting in a 45% increase in online sales and a 30% growth in customer base within the first six months of launch.
- Designed and implemented a user-friendly interface for a popular travel app, leading to a 50% reduction in customer support inquiries and a 25% increase in app downloads within three months.
- Successfully managed a team of five developers in the creation of a mobile game that reached over 100,000 downloads within the first two weeks of release, generating \$75,000 in revenue.
- Optimized the performance of an existing social media app, reducing crash rates by 60% and improving load times by 40%, resulting in a 15% increase in daily active users and a 10% boost in ad revenue.

Associate Mobile App Developer at Aporia Solutions, KY

Aug 2022 - Feb 2023

- Developed a new mobile app for Aporia Solutions, which increased user engagement by 35% and garnered over 50,000 downloads within the first three months of launch.
- Streamlined the mobile app development process by implementing agile methodologies and reducing the average project completion time by 20%, resulting in increased productivity and faster time-to-market for new products.
- Successfully resolved over 90% of reported app bugs and issues within 48 hours, leading to a significant improvement in overall customer satisfaction and a 15% reduction in support tickets.
- Collaborated with cross-functional teams to design and launch a key app feature, which boosted in-app purchases by 25% and contributed to a 10% increase in overall company revenue.

Bachelor of Science in Mobile Application Development at University of Kentucky, Lexington, KY

Aug 2018 - May 2022
