

Mir Ali Shahidi

Senior Information Security Analyst | Ethical Hacker | Cisco Network Engineer

Tehran, Iran | Email: info@miralishahidi.ir | Phone: +98 936 071 5710 | Website: <https://www.miralishahidi.ir> | ORCID: <https://orcid.org/0009-0002-4304-9480>

Professional Summary

Experienced Information Security Analyst, Ethical Hacker, Network Security Specialist, and Software Developer with extensive expertise in cybersecurity, penetration testing, vulnerability assessment, secure network architecture, incident response, threat intelligence, digital forensics, cloud security, and information security management. Proven experience supporting enterprise infrastructures, conducting authorized security assessments, and implementing defense-in-depth security strategies.

Core Competencies

Penetration Testing • Ethical Hacking • Network Security Architecture • Cyber Threat Intelligence • Vulnerability Assessment • Incident Response • Digital Forensics • Security Operations (SOC) • Cloud Security • Risk Management • ISMS • Security Auditing • Defense in Depth (DiD) • Secure Network Design • BCP • DRP

Technical Skills

Programming: Python, Java, C, C++, JavaScript, PHP, Ruby, C# • Frameworks: Django, Flask, Laravel, React, Angular, Vue.js, .NET Core • Databases: MySQL, PostgreSQL, MongoDB, SQL Server, Oracle, Redis • Servers: Apache, Nginx, IIS, Tomcat, Node.js, Caddy • Networking: TCP/IP, IPv4/IPv6, Routing, Switching, MPLS, VPN, QoS • Security Tools: Metasploit, Burp Suite, Wireshark, Nmap, SIEM Platforms • Frameworks & Standards: NIST, CIS Controls, ISO/IEC 27001

Professional Experience

Cisco Network Engineer & Ethical Hacker

Rightel Mobile Operator | Tehran, Iran | Dec 2016 – Jun 2017

- Managed enterprise network infrastructure and security operations.
- Performed penetration testing and vulnerability assessments.
- Implemented secure network architecture and defense-in-depth strategies.
- Supported routing, switching, VPN, and network security technologies.

Information Security Analyst & Penetration Tester

Contract-Based Security Projects

- Conducted authorized penetration testing and security assessments.
- Performed OWASP-based web application security testing.
- Delivered risk analysis and remediation recommendations.
- Participated in incident response, cyber investigations, and security audits.

Certifications

CCNA • Network+ • Information Security & Network Management • Python Programming • HTML/CSS Development • Cybersecurity & Ethical Hacking Training Programs

Education

Diploma in Theoretical Sciences (Mathematics, Physics, Chemistry)

Advanced self-directed studies in Cybersecurity, Information Security, Computer Networks, Software Development, and Network Security.

Specializations

Network Penetration Testing • Web Application Security (OWASP) • Wireless Security • Reverse Engineering • Threat Intelligence • Malware Analysis • Security Architecture • Digital Forensics • Cloud Security • Incident Response • Risk Assessment

Languages

Persian (Native) • English (Professional Working Proficiency)
