Simplilearn

EXTRACURRICULAR

PwC Switzerland Power BI Job Simulation on Forage March 2024

Excelled in Power BI job simulation, crafting dynamic dashboards highlighting KPIs and delivering tailored data visualization solutions.

Accenture North America Data Analytics and Visualization Job Simulation on Forage Jan 2024

Advised hypothetical social media client as Data Analyst. Delivered insights via PowerPoint deck and video presentation.

ACHIEVEMENTS

- Successfully completed a relevant internship in Data Analytics and accomplished specific project. Received positive recognition from supervisors and certification from Accenture and PwC.
 - Acquired and mastered new skills relevant to the desired job also completed relevant coursework and certifications.
-

PROJECTS

CUSTOMER CHURN ANALYSIS, MICROSOFT POWER BI

- Examined customer churn patterns, the examination uncovered insights into factors influencing churn, including contract types and demographic trends.
- By cleaning and analyzing data using Power BI Desktop, I gained a comprehensive understanding of customer behavior.
- These findings will inform strategic initiatives aimed at enhancing customer retention and optimizing business performance.

DIVERSITY AND INCLUSION, MICROSOFT POWER BI

- Through various metrics and visualizations, the report highlights the representation of different demographic groups within the organization, including gender, race, ethnicity, and age.
- It tracks progress towards diversity and inclusion goals, showcasing initiatives aimed at promoting equality and belonging among all employees.
- By transparently presenting data on hiring, promotion, and retention rates across diverse groups, the dashboard enables stakeholders to assess the effectiveness of diversity and inclusion strategies.

COMPARATIVE STUDY OF COUNTRIES, TABLEAU

- As an insurance data analyst, I analyzed income, insurance metrics, and market data globally.
- Utilizing Insurance Sample and Global Financial Development datasets, I created a dynamic dashboard featuring geographic maps, World Bank data integration, KPI tables, and trend analysis, enhancing insights with income group filters.

IBM HR ANALYTICS EMPLOYEE ATTRITION & PERFORMANCE, PYTHON

- IBM, a global tech giant, faces attrition risks in its service sectors.
- Leveraging Python tools for data analysis, a logistic regression model achieved 83.29% accuracy, crucial for retaining skilled personnel, vital assets in computing, software, and hardware services across 170 countries.

AIR CARGO ANALYSIS, MYSQL

- Implemented ER diagram, queries for route details creation, passenger extraction, revenue calculation, and user access granting.
 - Utilized various SQL functionalities like Group By, Having, IF clause, window functions, rollup, stored procedures, and cursor operations for diverse database operations.
-

LANGUAGES

English, Kannada and Hindi
