

Bello Shehu Ango

Python Developer

Nigeria | +2349066122515

[GitHub](#) | angobello0@gmail.com | [LinkedIn](#)

Accomplished and solution-oriented professional with substantial experience designing, developing, and maintaining sophisticated software applications by leveraging Python programming language. Proven expertise in establishing positive and productive relationships with team members and fostering collaborative and inclusive atmosphere to meet deadlines and deliver results. Talent for understanding, implementing, and promoting software architecture patterns. Well-versed in collaborating with cross-functional teams, skillfully gathering requirements, and translating into precisely defined technical specifications. Instrumental in crafting clean, efficient, and maintainable code in adherence to coding standards and best practices.

Technical Proficiencies

Programming Languages:	Python, C, C++, JavaScript, SQL
Libraries and Frameworks:	FastAPI, Django, Django REST, Pandas, Selenium
Tools and Platforms:	Railway.app, Postman, IPRoyal, AWS, Azure
Databases:	PostgreSQL, MySQL, SQLite, MonetDB

Career Experience

Elevate Media, Remote Software Engineer II

2022 – 2023

Oversaw development of robust backend APIs for multiple high-traffic news websites, ensuring remarkable performance and scalability to accommodate large user base. Streamlined access to crucial metrics and data from all websites, including ad revenue and Google Analytics information by pioneering development of centralized admin dashboard for company. Supervised testing of bot detectors by designing sophisticated bot that emulated human behaviour.

- Validated effectiveness of bot detection system by reinforcing platform's security measures.
- Elevated user experience through strategic optimisation of server response times and minimising downtime.
- Managed and expertly deployed the APIs on Railway with AWS S3 storage, ensuring seamless integration and efficient data management.

Soundkinesis, Remote Backend Developer / Cloud Engineer

2022

Secured smooth functioning of applications while troubleshooting and debugging backend issues. Oversaw and optimised cloud infrastructure on platforms, including AWS, Azure, and Google Cloud. Collaborated with the development team to understand requirements and implement solutions. Implemented security measures and top-notch practices to safeguard data and applications.

- Ensured reliable and scalable performance for services by managing and optimising cloud infrastructure on AWS.
- Led development of backend API utilising Django by establishing robust foundation for smooth data processing and seamless interactions.

Key Projects

HandyGuide | [Link](#) | Reacts, Typescript, Next, FastAPI, AWS, Railway

- Leveraged AWS S3 for secure and scalable storage of resources.
- Project code is open source, encouraging collaboration and continuous improvement.
- Pioneered website aimed at easing access to school materials for Nigerian Universities.
- Supervised collaborative effort with a team of three frontend developers, a cloud engineer, and a UI designer to successfully bring project to life.
- Gained approval from Usman Danfodiyo University's Computer Science department and garnered attention from Muslim Student Society (MSS) of Nigeria for innovative education modernization.

Shaap Delivery | [Link](#) | Flutter, Django REST, PostgreSQL, Railway, Azure

- Developed accompanying mobile application for SHAAP Delivery by collaborating with mobile app developer.
- Founded SHAAP Delivery, food delivery startup built on Flutter and Django REST, utilizing Azure's blob storage and hosted on Railway for efficient service.
