Mountain View, CA | akshitgaur997@gmail.com | 408-594-8958 | akshitgaur.com | LinkedIn | GitHub

Experienced Python Developer and AI enthusiast with 4+ years in software development, specializing in automation, integration, and machine learning.

Education

-
- Carnegie Mellon University**, MS in Software Management, SE Track Aug 2024 – Dec 2025
- **Coursework:** Engineering Management, Foundations of Software Engineering, Machine Learning, Deep Learning, Computer Networks
- University of Waterloo**, BS in Mathematics, Minor: Computer Science, Economics Aug 2015 – Apr 2020
- **Coursework:** Objected Orientated Programming, Data Structures, Computer Networks, Data Management, Advanced Linear Algebra, Advanced Calculus

Experience

-
- Python Developer**, Corus Entertainment – Toronto, Ontario Feb 2022 – Aug 2024
- Spearheaded the collaborative development of 650 test automations which led to a 50% reduction in deployment time by using Python libraries such as Pandas and Behave.
 - Ensured the protection of company rights as measured by the accurate processing of 150,000 data points daily by creating an integration layer.
 - Leveraged knowledge in Python, Git, Docker containers, CI/CD Pipelines, MySQL, C# programming, Solution architecture, Objected Oriented Programming and API automation, Agile Methodology, Jira
- Python Developer**, Multi Health Systems – Toronto, Ontario Apr 2021 – Feb 2022
- Automated the company's business workflows that resulted to a 30% increase in operational efficiency by integrating the Shopify storefront with Dynamics CRM using Python and the .Net framework.
 - Reduced response time by 400% as measured by faster handling of disputes by implementing AI-driven responses and integrating tickets directly into the CRM.
 - Leveraged knowledge in Git, Microsoft .Net Framework, programming in Python, C# and RPA systems on Microsoft Power Platform, Agile Methodology, Jira

Projects

Building an LLM from Scratch

- Developing a large language model using PyTorch to perform human-like tasks like text summarizing and generation.

Chess

- Collaboratively developed a fully functionally game of chess using C++ with multiple AI levels.

Expense Tracker

- Developed an expense tracking tool to track my expenses for my master's program with dynamic Generative AI counselling capabilities using React.JS and HTML5.

Volunteering

Experience

-
- Python Instructor**, Code in Place, Stanford University – Palo Alto, California May 2021 – Present
- Teaching Python fundamentals to students globally using the Stanford University network of 11,000 students.
 - Promoted to Head TA in May 2022 thereby leading a team of 12 python instructors

Skills

Languages: Python, C++, C, Java, Typescript, C#, SQL, Kotlin, JavaScript

Technologies: Docker, Microsoft Azure, Flask, MySQL, Git, Jira

Leadership: Presentation, Communication, Team Collaboration, Strong Time Management
