SUMMARY

Data Analytics professional, specialize in Python visualization libraries, Power BI, with expertise in data warehousing, data modeling, and SQL. Skilled in python and CPP programming .

EDUCATION

B.Tech in Computer Science Arya College Of Engineering and I.T.	2019-2023	9.32 CGPA
Intermediate New Way Sr. Sec. School CBSE	2018-2019	71%

EXPERIENCE

Celebal Technology - Jr. Associate Power BI Developer

(July 2023-Dec 2023)

- Collaborated with Multiple Business Domain Clients Like Sales Management, Finance in Agile Methodology.
- Orchestrated full-cycle development of Reports and Dashboards in Power BI, employing DAX for data insights and Power Query Editor for efficient data cleansing, resulting in a 40% reduction in reporting errors.
- Designed and implemented SQL stored procedures to efficiently perform data transformations using window functions ,mathematical functions.
- Contributed to setting up row level security, object level Security , gateway connections,Refresh Options.

Celebal Technology - Data Science Intern

(Jun2022-July 2022)

- Administered statistical methods for in-depth analysis in finance, and operations.
- Incorporated and identified trends in large datasets, extracting actionable insights for business growth.
- Formalised writing python Scripts Store Procedures, CTE, Sub queries, views, Temp table, and indexes using DDL and DML Commands.

Sparks Foundation - Data Analytics Intern

(July2021-Aug 2021)

- Facilitated exploratory data analysis, managed data cleaning, and implemented graphical visualization on a global terrorism dataset. Utilized SSMS for SQL querying, optimizing views for enhanced data interpretation and analysis.

PROJECTS

- **Movie recommendation system -Content based movie prediction system using python.** [!\[\]\(cc0da69b57cc8625c10a850ea917e99a_img.jpg\)](#)
 - Executed EDA to understand the data and performed data pre-processing concepts like filling NULL values and removing outliers .
 - Composed the plotting of Box plot and Scatter plots to handle the outliers.
- **Northwind Sales Report using Power BI** [!\[\]\(f2ca2c3f080f0b2f60d381d33dfc58d9_img.jpg\)](#)
 - Performed Data Discover and Data Analysis on the Northwind traders dataset available on kaggle.
 - Utilized Power Query Editor and DAX language for data transformation and cleaning .
 - Collaborated slicers and derived insights calculated measures product , region and employee wise.
- **Influencer - Brand Marketing Wireframe (UI using Figma)** [!\[\]\(ec311ba19a628a47724772b6afe2fe46_img.jpg\)](#)
 - Curated user-friendly Figma wireframe prototype for Influencer-Brand Matching System, optimizing communication with intuitive, streamlined interfaces, ensuring seamless user experiences.

SKILLS

Languages	C, C++, Python
Data Analytics	Visualization Libraries, Power BI Desktop, Service, Machine Learning
Others	SSMS, SQL, Operating system, OOP, DBMS, Data Modelling, Figma

CERTIFICATES

- PL 300 Microsoft Power BI Data Analyst
- SQL by Hackerrank
- Machine learning by coding blocks
- Data Science and Machine Learning by Grass Solutions
- Power Programming using Python by Grass Solutions
