Batumi

EXPERIENCE

Python Developer

Andersen

📅 08/2025 - Present

📍 Batumi, Georgia

Developed a new desktop engineering application for Drill Cool Systems to simulate and visualize wellbore temperature profiles, modernizing a workflow previously based on legacy Fortran GeoTemp), Drillbench, and Excel calculations. Worked on requirements clarification with stakeholders, UX/UI concept, and implementation of a GUI-driven modeling workflow with data import/export Excel/PDF. Initially joined the project as a Python Developer, later transitioning into Team Lead role (small team, 2 backs and 2 fronts)

Tech stack:

PyQt6, NumPy, Pandas, Matplotlib

Python Developer

MITRIX Technology LLC

📅 09/2022 - 08/2025

Leadguru is a platform that simplifies social selling on Slack and Discord. The idea of automating the lead generation process on Slack originated a few years ago within the software house, Mitrix. The product's MVP was a simple scraper that tracked communities for defined keywords. As Slack social selling succeeded, Revenue from Leadguru's leads grew. This prompted us to enhance the product further. Initially joined the project as a Python Developer, later transitioning into the roles of Backend Architect and Prompt Engineer, contributing to system design and AI-driven development.

Tech stack:

Flask, Fastapi, Mongodb, Azure, GCP, pubsub, pytest, 3-rd party integrations:

ChatGPT, Slack, Discord, Telegram.

- A user-friendly and visually compelling interface, making it enjoyable to work with the solution
- CRM functionality, enabling systematic work
- Canned responses, to speed up operations
- Mass messaging to community members, facilitating easy follow-ups and warming up contacts
- Bulk posting in channels, to expand outreach
- Analytics on community engagement, to enhance effectiveness

Python Developer

Elinext

📅 06/2021 - 08/2022

📍 Minsk, Belarus

Software development and deployment (web, Implementations of 3rdparty API)

- AWS
- FastApi (rest)
- Strawberry (graphql)
- PostgreSQL
- MongoDB
- alembic • pytest

SUMMARY

Interests: computers, memes, MMA and self improvement.

Skills:

- Python
- MongoDB, PostgreSQL
- FastApi
- Rest, GraphQL
- prompt engineering
- pytest, unittest

EXPERIENCE

Python Developer

EPAM Systems

📅 07/2020 - 06/2021

📍 Minsk, Belarus

- Passed learning courses (about 7 months)
- Worked as a trainee Python developer on the project (for 6 months)

EDUCATION

logistic-economist

Belarusian State University

📅 01/2013 - 12/2018

python developer

EPAM UpSKILL Lab

📅 07/2020 - 02/2021
