PROFESSIONAL SUMMARY

Seasoned Robotics Engineer with 10 years of experience in developing and optimizing robotic systems and automation solutions. Expert in mechanical design, control systems, and software integration, I drive innovation through data-driven methodologies. My focus on collaboration and efficiency has consistently resulted in successful project outcomes that advance operational capabilities.

WORK EXPERIENCE

Robotics Engineer Jan / 2019-Ongoing
Blue Sky Innovations Chicago, IL

- 1. Developed and executed maintenance training programs for ABB Robotics, enhancing team skills.
- 2. Supported over 100 robots in a high-pressure die-casting facility, ensuring optimal performance.
- 3. Conducted preventative maintenance and inspections on robotic systems, improving reliability.
- 4. Implemented an in-house refurbishment program, reducing downtime and repair costs.
- 5. Created downtime analysis reports to identify and resolve operational inefficiencies.
- 6. Utilized monocular stereo cameras for real-time 3D mapping and localization of robotic systems.
- 7. Evaluated and tested prototypes of new robotic systems for performance and reliability.

Robotics Engineer Jan / 2015-Jan / 2019
Crescent Moon Design Portland, OR

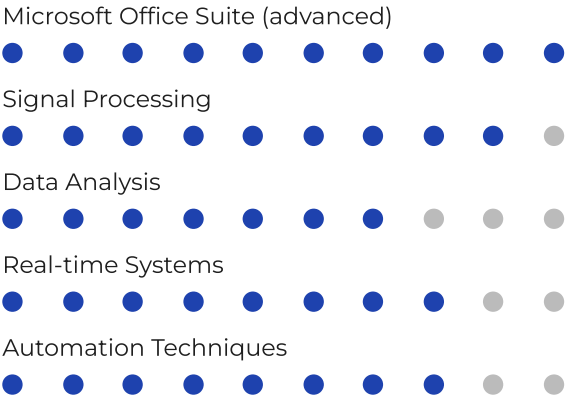

- 1. Integrated automated material handling and quality control systems for the company's first flexible manufacturing line.
- 2. Developed firmware in multiple programming languages for robotics applications.
- 3. Authored technical documentation for robotics operations and maintenance.
- 4. Applied GD&T principles using AutoCAD for optimal robot design and space utilization.
- 5. Programmed Fanuc robots for welding applications, improving product quality.

EDUCATION

Master of Science in Robotics Engineering Jan / 2012 Jan / 2015
Carnegie Mellon University Santa Monica, CA

Focused on advanced robotic systems design, programming, and automation technologies.

SKILLS

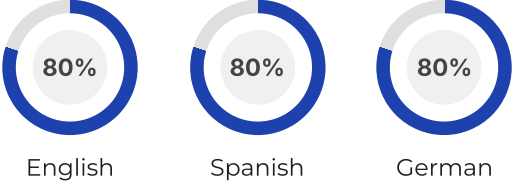

INTERESTS

- Podcasts Language Learning
Dancing Cycling

STRENGTHS

- Intuition Leadership
Listening Mentorship

LANGUAGES

ACHIEVEMENTS

- Increased robotic system uptime by 30% through a proactive maintenance program.
- Led the design and implementation of an automated assembly line, reducing production time by 25%.
