SENIOR .NET DEVELOPER

I am a full stack web developer with more than 6 years of experience. I have worked in multilingual and multicultural contexts, and I offer my **adaptability to new techs, Agile mindset, experience** and the possibility of working as a contractor to USA and Canada, or contractor or employee to countries in the European Union sphere, like Switzerland, Denmark, Ireland or Norway, for example.

WORK EXPERIENCE

04/2024 - Current: Senior Level Software Developer as Contractor

- Same as in the previous position, but with a higher level of responsibility.

06/2020 - 04/2024: Senior Level Software Developer at Sopra Steria

- Agile framework, with more than 120 sprints in SCRUM and half a year in KANBAN
- Error analysis and correction in all environments (development, testing and production environments).
- Analysis of client needs, creating a code rutemap, a time to code budget, breaking down the code rutemap to tasks and explaining them to juniors developers.
- Coding, mainly in the following languages:
 - C#, Javascript/Typescript, HTML, CSS, React, SQL, JQuery.
- Meetings with clients and POs, to support my team leader by explaining how the new features worked or justifying delays, for example.
- Temporary support to overloaded teams, adding value from minute one.
- Code reviews.

09/2018 - 05/2020: Junior Software Developer at Sopra Steria

- Support task to reduce the workload of more experienced developers.
- Migration of non priority apps to modern languages.
- Smalls improvement in users interface.
- Smalls modifications of databases tables.
- Documenting new features.

EDUCATION

09/2016 - 06/2018 Transport and Logistics: Advance vocational training course at Federica Montsery

It's not related with this offer. Added just to avoid empty years in this resume.

09/2011 - 06/2015 Engineering degree at Charles III University

Focused in electrical engineering, before turning my career to software development.

COURSES

I keep myself in a continuously learning state, so I will just to mention the most relevant courses to this position:

- Desing patterns for code development, Udemy.
- Advance C# backend development, Udemy.
- From Zero to Hero React development, Udemy.

LANGUAGES AND OTHER SKILLS

- Fluent English speaker.
- Native Spanish speaker.
- Fluent only in the work environment French speaker.
- Driving license.
- Remote worker.
- Able to travel sporadically.
