SUMMARY

Software engineer with 20+ years of experience in designing and developing desktop, web, mobile, distributed and cloud systems for companies of various fields of activity. Experienced in C#, .Net, Azure, Blazor, Maui and other Microsoft software development technologies. Also, experienced in leading teams in challenging projects and delivering valuable software.

WORK EXPERIENCE

Software Architect / Team Leader

Ravaneda Consulting

Sep/2021 – Feb/2024 (2 yrs 6 mos)

- Design, architect and team-leader of DooConnect, a federal, state, and municipal taxes processing software which provides dashboards, notifications, insights, statistics and a fiscal calendar to companies to automate taxes processing and paying (in progress).
- Design, architect and team-leader of ANYPRO. An ERP web to manage companies, their projects, tasks, timekeeping, employees, budget, finance, accounting and more.
- Development of a cross-platform mobile app (Android / iOS) to manage the receiving and dispatching of goods and trucks in a multinational logistics warehouses company. The app decreased 50% the time to load and unload a truck and decreased the checking error rate from 20% to 3%.
- Development of SIPROC, a web application for public agencies management and administration. An application to structure and standardize the processes reducing paperwork and bureaucracy and increasing the efficiency of the Brazilian city halls.

Tech Leader

GOVBR – Governança Brasil

Sep/2017 – Sep/2021 (4 yrs 1 mo)

- I designed, architected, and led the team to implement the eSocial integration. eSocial is the digital recording system for tax, social security and labor obligations created by the Brazilian federal government to facilitate and minimize bureaucracy for companies when reporting information about their employees. Different from the competitors, this software requires zero data entry or adjustments from the user and provides automated functions which reduces the user workload by 40% in these processes.
- Led the team through the process of migrating the systems from VB6 to VB.NET. This task took 2 years given the size and importance of the application.
- Led a team of 10 in maintaining and improving the systems related to HR and accountability.

Systems Analyst

GOVBR – Governança Brasil

Nov/2016 – Sep/2017 (11 mos)

- I developed, maintained, and improved the modules related to HR and accountability of the system focusing on reducing bugs and improving overall systems quality. My solutions reduced the workload of the users in about 20% in their daily tasks.

Lead Software Engineer

Bitmake (Self-employed)

Jun/2015 – Nov/2016 (1 yr 6 mos)

- I helped companies to overcome technological challenges by taking projects off paper and implementing them efficiently.

Senior Software Engineer

Megawork

Jan/2013 – Jun/2015 (2 yrs 6 mos)

- I developed custom systems, internet and intranet portals using ASP.Net and SharePoint for large companies like: Vale, Samarco Mining, Votorantim Group and others. Also, I was responsible for requirements analysis, prototyping and systems modeling.

Software Engineer

QUAY – Technology to Innovate

Jul/2010 – Jan/2013 (2 yrs 7 mos)

- I developed custom systems, and private social networks for companies from the energy distribution sector.

.Net Developer

Prismafive

Sep/2009 – Jun/2010 (10 mos)

- I maintained and improved the main product of the company which is desktop software for compounding pharmacy management used for more than 800 customers.
- I developed a help desk application with an integrated online chat and knowledge base. This application is responsible for managing the support tickets of Prismafive systems users.

Software Developer

ITASOFT

Jan/2007 – Aug/2009 (2yrs 8 mos)

- I maintained and helped to modernize the ERP developed by ITASOFT. Working as an ERP developer gives me experience in various areas of the industry like orders, stock management, budgets, financing, accounting, customers relationship and more.

-- older and less relevant work experience was omitted for brevity. --

EDUCATION

Post-Graduation in Software Engineering

Unisociesc - Brazil

Graduation (bachelor) in Computer Science

UNIVALI - Brazil

TECHNICAL SKILLS

Software Development

.Net Core; C#; ASP.Net; Blazor; WPF; Maui; Javascript; Typescript; VB.NET; Python; Angular; HTML; CSS; API's; SOLID; Design Patterns

Databases

SQL Server; PostgreSQL; Oracle; MongoDB; Redis; Design and Modeling; NoSQL

Cloud Computing

Azure; Docker; Kubernetes; Serverless; Azure Functions; Microservices

Other

GIT; Github; Azure Devops; TDD; DDD; UML; Clean Code; Clean Architecture; Powershell; Agile; Scrum; Kanban; XP; Object Oriented Design; OAuth, OpenId, Identity Server; SOAP; REST; API

SOFT SKILLS

Transparent communication; Time management; Problem solving; Teamwork; Leadership; Mentorship; Interpersonal skills; Attention to detail; Commitment to results; Requirements Gathering.

COURSES & CERTIFICATES

- 2021 - AZ-900 – Microsoft Azure Fundamentals Azure Certified
- 2021 - AZ-900 – Microsoft Azure Fundamentals Preparatory Course
- 2021 - AZ-204 - Developing Solutions for Microsoft Azure Preparatory Course
- 2021 - Building Microservices with .Net – The Basics
- 2021 - Microservices Architecture and Implementation on .Net 5
- 2021 - Getting Started with .Net Core Microservices and RabbitMQ
- 2021 - Understanding Typescript
- 2021 - Javascript and Typescript from Basic to Advanced 2021
- 2021 - Complete Guide to Elasticsearch
- 2021 - Advanced ASP.NET Core – MVC

- 2021 - Unit Testing for C# Developers
- 2021 - Unit Testing with NUnit and C#
- 2021 - Getting Started with .Net Core Clean Architecture
- 2021 - Design Patterns with C# - Advanced Development
- 2021 - Docker: Essential Tool for Developers
- 2021 - Docker Essentials for the .Net Platform
- 2020 - GOVBR - Leaders Academy
- 2020 - Dependency Injection for C# Developers
- 2020 - C# Advanced Topics: Prepare for Technical Interviews
- 2008 - Programming with Microsoft Visual Basic .NET
- 2009 - Development with C# and ASP.Net
