<http://mason.gmu.edu/~vvulchi/> 

- Software engineer with 4 years of experience in computer science and full stack development on enterprise level mobile and web applications.
- Close interactions with project clients and stakeholders gave me a great experience and foresight to look at the products from the end user's point and view.
- Strong experience in building enterprise level mobile applications using Xamarin technology, c# and Azure Devops.
- Good working knowledge on architecting and building web applications using polymer js, HTML, CSS, JavaScript, Java and c#.
- Experience in working on all phases of software development life cycle practices and with different software development methodologies like agile and waterfall.
- Extensive knowledge with database technologies like Oracle SQL, MYSQL and Postgres SQL.
- Good working knowledge of scripting languages like JavaScript, Python and Groovy.
- Basic understanding of various cloud technologies like AWS, Azure and Google cloud platform.
- Troubleshooted, resolved and recommended improvement for application development issues, security risks at across multiple technology solutions.
- Describe myself as focused and quick thinker in critical situations, quick-learning individual, motivated and a great team-player.

Skills

- Programming languages: Java, C, C++, C#.
- Web languages: HTML, Polymer js, Angular js.
- Mobile Development: React-native, Xamarin, Native-script Angular.
- Databases: MySQL, Oracle SQL.
- Cloud based development: AWS, Azure.
- Other: Docker, Junit testing.

Experience

FEBRUARY 2020 – PRESENT

Application Development Engineer, (Contract – Cummins Inc.), Axiscades Inc.

- Develop, custom software applications using Java, Spring technology, C++, XML, REST API, SQL and Azure.
- Document the software architecture by using various diagrammatic representations to show different states, flows, different components involved in the software application.
- Experience in using Eclipse IDE, IntelliJ Idea IDE, Android Studio, Microsoft Visual Studio, Microsoft Azure blob storage, SQL developer, Toad IDE, Swagger tool to develop the core, backend, frontend and database related logic and operations in creating the software applications.
- Experience in using IntelliJ Idea IDE, Eclipse IDE, Microsoft Visual Studio, Microsoft Azure tools and Swagger tool in testing the created software applications.

- Experience in using Microsoft Azure tools for deployment, delivery, and postproduction management of the software applications.
- Work to ensure compliance with industry standards by participating in the code reviews, documentation reviews and application reviews.
- Maintain and update the documentation throughout the software development life cycle phases.
- Perform system critical production validation post migration and delivery of the software applications using various production management tools in Microsoft Azure platform.
- Provide support to clients and customers of the team for the developed software applications and solutions by working on resolving issues in production and service.

NOVEMBER 2019 – FEBRUARY 2020

Software Developer, PropMe LLC.

- Develop enterprise level web and mobile applications using NodeJS, VueJS, TypeScript, AWS and linux.
- Build cross platform mobile applications for Android, IOS using TypeScript and Angular.
- Experience in using Azure Devops, GitLab as the project management tools for maintaining, tracking development.
- Experience in using Amazon EC2 instance as staging server for maintaining and deploying required web and mobile applications.
- Lead and monitor junior developers in the team with organizing meetings, development tasks and code merge requests.

JULY 2018 – NOVEMBER 2019

Software Developer, Mobile Application Developer, Abas-USA.

- Working as a mobile developer as a part of mobile development team with 6 developers.
- Developing mobile applications using Xamarin platform (Xaml and C#).
- Building cross platform mobile applications based on ERP systems for Windows, IOS and Android.
- Customizing the mobile applications both as standard apps for the store and customer-centric apps upon customer requests.
- Collaborating with different customers to deliver the Abas ERP standard mobile applications by customizing the applications as per requests of the customer and adapting the applications to their process.
- Support various customers with the Abas ERP based applications with any issues, updates, and custom deployments. -Using JIRA as the ticketing system for issue tracking, documenting and error resolving during the customer support.
- Experience in using Teams Foundation Services and Azure Devops Server for maintaining internal repositories, Continuous Integration/Continuous Delivery services.

JANUARY 2018 – JULY 2018

Software Developer, (Contract: Abas USA) –Aston Carter, Populus Group LLC.

- Experience as a web developer with a scrum team of 6 members for a web application product named workflow.
- Developing the hybrid web product with Polymer js, javascript for front end development, java for backend development and camunda server.
- Working with AWS cloud for hosting the application on cloud maintaining the product as a hybrid product.

- Support various customers with the workflow application installations, configuration and provide technical support to help and learn the workflow tool usage.
- Support various customers as a technical consultant to do server level installations and implementation.

NOVEMBER 2017 – MAY 2018

Mobile Application Developer, Foobee LLC.

- Experience as a Senior Mobile App Developer in a development team with 5 developers.
- Lead the development team by organizing team meetings, monitoring development with allocation of tasks and code merge requests in git.
- Developed a mobile app on React Native platform to create the Front end of the application.
- Experience in using Google Cloud platform and firebase as mobile application backend as a service.
- Developed the mobile app to be cross platform and hybrid to be a cloud based mobile application.
- Developed the mobile app on both IOS and Android platforms making the app to be cross platform compatible in a startup environment.

AUGUST 2017 – DECEMBER 2017

Java Developer- Intern, Olympia University of Business and Technology.

- Experience in development with AWS services like Lambda, DynamoDB, S3 using Java8.
- Experience in using Jenkins Server, Apache Tomcat server and shell scripting for automation process.
- Experience in using Maven and Gradle tools, Eclipse IDE for build and deployment.
- Maintain the development and architecture for the solutions using AWS cloud formation stack.

Education

MAY 2017

Master of Science - Software Engineering, George Mason University, Fairfax, VA.

JUNE 2015

Bachelor's degree - Computer Science, GITAM University, Visakhapatnam, India.
