Experience

2024 - Present

GLKR Software

Senior Flutter Developer

Developed Flutter-based mobile applications for **construction site operations**, integrating with existing backend systems. Built core modules including reporting, accounting, purchasing, material demand, and payroll management, along with **real-time notifications**. Additionally, developed a real-time mobile control app for a **proprietary 3D printer**, enabling full device management (temperature, calibration, error handling, start/stop) using **Socket.IO**.

2020 - Present

Fiverr & Bionluk

Flutter Developer (Freelancer)

Depending on the customer's desires, I am creating a new application, adding features to an existing application, or solving a bug in the application. My tasks are basically; **UI Designs, Backend API Integration**(using GraphQL & JSON), Backend Authentication Integration(using **JWT** mostly), **Firestore Module Integrations**(Messaging & Remote Control & Analytics & Database & Authentication ...) , **In-App Purchase/Subscription** (RevenueCat), AdMob Integration, pub.dev library integration ...

2021 - 2022

FreshApps at Eindhoven, Netherlands

Flutter Developer

Developed a multi-role application (customer, market, courier) called DIDIYO. Managed the project using **2-week sprints** with **JIRA, Time Doctor, Zoom, and Teams**. Utilized Bitbucket for version control (Git). My tasks are basically; **UI design, Backend API integration (GraphQL & JSON), Payment gateway integration, Rich notification & deep link integration**. *Plus, while working the company, I developed and published "Add to Cart Animation" on [pub.dev](#), gaining 300+ likes and 2.6K+ downloads 🥳*

2019 - 2020

Efor Group Insurance/Brokers

Software Developer

At Efor Group, I developed a **.NET application** that integrates with Kolmisoft telecom software to fetch call recordings and format them into **JSON** for BTK. I used various **design patterns** to improve the app's structure. I also built another .NET tool to parse insurance policy emails from different companies, using the **Factory pattern** to select the correct parser (e.g., AllianzParser, AksigortaParser) based on the email format.

2018 - 2019

Fastsoft Information Technology at Ankara, Türkiye

Full-Stack Software Developer

The company provides general software solutions for hospitals. I have used many programming languages and technologies such as; **.Net Core, Angular, PostgreSQL, Microsoft SQL Server and TFS**.

About me

I am a computer engineer who worked with varieties programming language in IT sector. At first, I have started to learn JAVA by including Hibernate, Spring & Spring Boots. Later on, at my first professional job, I have learnt .Net Core, Angular & SQL. On my personal project, I have used Golang, NodeJS, React and even Vue. The language does not matter If you are professional enough! Finally, I am keeping up my journey by developing Mobile Apps with Swift & Flutter.
