EDUCATION

Georgia Institute of Technology

Master of Science in Computer Science, Specializing in Machine Learning

GPA: 4.00

Atlanta, GA

May 2027

Washington University in St. Louis

Bachelor of Science in Business and Computer Science, Focus in Business Analytics

GPA: 4.00 | Valedictorian | Graduation Student Speaker

St. Louis, MO

Dec 2023

EXPERIENCE

Inflow Vip

Founding Engineer

Remote

Jan 2025 - Present

- Lead product development, digital marketing strategy, and payment infrastructure to drive monetization for creators and growth for small businesses
- Partner with major organizations such as Himani Trust, Royal Family of Nepal, Bloom KTM Music Festival to lead influencer campaigns, website development, cultural outreach, and payment collection
- Scaled a Web3 invite-only platform connecting 100+ micro-influencers, 13 musicians, and 20+ businesses across 11 countries, generating 5.6M+ monthly views

Capital One

Data Engineer

Chicago, IL

Aug 2024 - Apr 2025

- Led the migration of Card Data's ETL pipelines from AWS EMR (PySpark, Python) to a serverless Databricks environment (PySpark, C++), reducing processing time by 73% and compute costs by 22%
- Engineered and optimized large-scale datasets (150M+ items, 2K+ attributes) across DynamoDB, S3, Snowflake, and internal data lakes, driving \$1B+ NPV in marketing campaigns and enabling \$250M+ in new affiliate data use cases
- Developed high-performance APIs using FastAPI and AWS Lambda, integrating Apache Spark and Kafka to process ~10M real-time events and 3PB of batch data for Capital One Shopping, Legal/Risk, and internal analytics teams

WashU DevSTAC

Lead Software Engineer

Remote

Aug 2023 - Aug 2024

- Acted as a liaison between WashU and renowned clients such as Moelis' Catalyst Partners to create custom databases and analytic dashboards using Python, Flask, TypeScript, AWS RDS, PostgreSQL, and Tableau
- Led a team of 5 student engineers to provide mobile app development, full stack web development, graphic design, and data analytics services to both internal and external clients, brought in \$50K+ revenue from 9 clients' projects
- Developed various mobile applications for WashU Medicine in React Native including an app for interpreting complete blood count (CBC) test results and an app simplifying acute ischemic stroke decision-making

Capital One

Software Engineer Intern

Chicago, IL

Jun 2023 - Aug 2023

- Designed and developed a full stack application using Vue.js, Node.js, DynamoDB, AWS Lambda architecture, and custom APIs in an agile team of four interns
- Implemented patented technology to customize configurations in Amazon's Simple Queue Service, resulting in a 19.7% decrease in operations wait times and a 26.4% increase in efficiency for customer-agent matching
- Enhanced customer service by accurately matching 1.1M+ daily users with 850+ skill categories across 35K agents, improving resolution accuracy

United States Federal Reserve

Software Developer and Product Manager Intern

St. Louis, MO

Jun 2022 - Dec 2022

- Built a variety of low-code/mobile/web apps (React Native, C#, .NET, SQL) for the Fed's Banking Supervision group
- Worked on the Executive Contact System (ECS) which contacts executives of every bank in the US with updates from the Federal Reserve regarding interest rate changes, policy changes, etc
- Managed a cross-functional team of interns for the Fed's Business Interdisciplinary Event (BIE), resulting in the implementation of a comprehensive feedback system for Econ Lowdown, an award-winning economic education website
