

Great .NET Software Engineer Enterprise Web App Remote

WORLDWIDE

TenForce is an international software product company based in Leuven, Belgium with customers in Europe and the US. It has been around for 15 years and experiences double digit growth. As a result, it seeks to expand its Belgian Engineering team. For this reason, TenForce is looking for a Great C#.NET Software Engineer to build a great enterprise-class web application.

Our product is a pragmatic answer to the ever increasing demand for transparency, visibility and compliance.

- We are a professional software development company with high quality standards, a fully operational Engineering team and a professional helpdesk.
- The TenForce product is web-based, highly configurable and offered on premise or in a SaaS model.
- Multilingual, targeted at an international, enterprise market.
- In 2016 we made our application scalable for 500 users.
- Now we want to upgrade our architecture to support **thousands of users**.

We build a great enterprise-class product to enable people to stay on top of their work.

The Great C#.NET Software Engineer we are looking for has the following characteristics:

- **3+ years of relevant experience** on the job or side projects
- Able to deliver high quality working software.
- Mindset: **software development is craftsmanship**, not an academic collection of theories.
- Able to shift gears in a rapid changing environment: agility is key.
- You are innovation-focused.
- **WOW-factor material**.
- You are the living antithesis of mediocrity.

You will join a team of firm believers in Agile (Scrum, Kanban) and automated testing. Forget use cases and Big Design Upfront — we work with user stories and adapt as we go.

We already work with 6 people from Ukraine (2 of them are based in Belgium and 4 are living in Ukraine, working remotely). For you no direct customer contact is required. The team communicates over Microsoft Teams and webinars.

What are we looking for?

A Great C#.NET Software Engineer that can collaborate with his fellow software developers. You participate in standup, retrospective and refinement meetings

- You live and breathe **C# and .NET**.
- Hands-on experience in web app development with **NET and MSSQL**.
- You know all about the upcoming technologies.
- Able to work as a team player in an international environment.
- Good English communicator, written and spoken.
- Mild level of craziness.

Nice to have

- A **passion** for SQL Server (In another life you could be a DBA).
- Experience with REDIS cache and
- Experience with mobile development (Xamarin, HTML5, native etc.)

- Experience with unit testing and functional testing (Selenium).
- Experience with **PaaS** (Microsoft Azure, Google Cloud).

What's in it for you?

- Our Product Owner ensures you build the stuff that really matters (Purpose).
- An incredible experience of honing your enterprise-class skills by helping us **upgrading our architecture to support thousands of users** (Mastery).
- Building software in a professional environment.
- Ability to **shape your career** within TenForce for the long term (Autonomy).
- Access to all courses on **com** (Mastery).
- **Eternal respect** from your colleagues if you manage to build simple, powerful and future proof solutions.

TenForce is an interesting place

We count a lot of large Belgian corporations among our customers. We work for the Flemish Government and the European Commission. Our product is a leading solution in the domain of safety, health, environment and quality for many industrial organizations.
