

SAMI ALHARBI

Software Engineer

sami.obeid@outlook.com — +966 53 113 1327 — Riyadh, Saudi Arabia

[LinkedIn](#) — [GitHub](#) — [Portfolio](#)

PROFESSIONAL SUMMARY

Results-driven Software Engineer with almost 3 years of experience developing web applications using modern technologies. Proven expertise in full-stack development, microservices architecture, and cloud technologies. Strong background in JavaScript, Java, and .NET with hands-on experience in DevOps practices and Agile methodologies.

TECHNICAL SKILLS

Programming Languages: JavaScript, Java, C#

Frontend Technologies: React, Vue.js

Backend Frameworks: Express, Spring Boot, ASP.NET Core

Databases: MongoDB, PostgreSQL, Redis, Elasticsearch

Cloud & DevOps: Docker, Kubernetes, Jenkins, Kafka, MinIO, Nginx

Development Tools: Git, REST APIs, gRPC, Microservices, CI/CD, Agile/Scrum

PROFESSIONAL EXPERIENCE

Software Engineer — Confidential Government Agency

Dec 2024 - Present

Riyadh, Saudi Arabia

Project Focus: Full-stack development using Node.js, .NET, and Next.js

- Designed and built a complete **Uploaded Documents feature** enabling end users to upload documents into the system. Integrated **Tesseract OCR** for text extraction and **Elasticsearch** with Arabic analyzer for stemming and improving search quality, providing full-text search across all documents. Implemented a Cronjob to automatically retry failed OCR processing. Applied the **Saga pattern** to ensure data consistency across **MongoDB, MinIO, and Elasticsearch**
- Built scalable **audit logging feature** tracking all system changes with before/after values, user identification, and timestamp
- Worked with **event-driven architecture** using Kafka for message-based communication, enabling non-blocking processes and improved system performance
- Deployed containerized applications using Docker and configured Nginx reverse proxy

Software Engineer — Wakeb

Mar 2023 - Dec 2024

Riyadh, Saudi Arabia

Project Focus: Command and control web applications using Vue.js and Spring Boot with Agile methodology

- Developed and maintained **RESTful APIs**
- Implemented **UDP, API and MQTT integrations** between systems, enabling real-time data synchronization
- Conducted comprehensive **field testing** to ensure the reliability of the system.
- Established **code review processes** and Git branching strategies, improving code quality and reducing merge conflicts
- Mentored internships developers on best practices and introduced new technologies
- Participated in Agile methodologies and contributed to sprint planning, and retrospectives effectivity

KEY PROJECTS

CarShowroom Management System

Technologies: Spring HATEOAS - Hibernate - Postgres - Docker - Docker Compose - Liquibase - Jenkins - Swagger

Achievement: Developed full-stack application with CRUD operations, validation, pagination, and HATEOAS. Implemented complete CI/CD pipeline with automated deployment across dev/staging/prod environments using Docker containers and private registry

Riyadh Real Estate Bot

Technologies: Python - SQLite - Tweepy - Telegram Bot API - PM2 - Threading

Achievement: Developed autonomous multi-platform social media bot with sharing all Riyadh real estate deals in real time

EDUCATION

Bachelor of Information Technology — Second Class Honors
Qassim University, Saudi Arabia

2018 - 2023

CERTIFICATIONS

- **Certified Kubernetes Application Developer (CKAD)** - Cloud Native Computing Foundation
- **Angular - The Complete Guide (2024 Edition)** - Udemy
- **Java Web Developer Nanodegree** - Udacity
