EXPERIENCE

Facebook, Software Engineer

August 2019 — Present

George Washington University, Teaching Assistant

January 2017 — May 2017, August 2017 — December 2017, August 2018 — December 2018

- Taught a lab section for Computer Architecture course in Fall 2018
- Assisted with lessons and labs for Algorithms and Data Structures course in Spring 2017 and Computer Architecture course in Fall 2017
- Held office hours to assist students with further questions outside of class and lab

Capital One, Data Engineering Intern

June 2018 — August 2018

- Contributed to a data pipeline for ingesting and processing marketing data
- Developed serverless microservices for the data pipeline using Python and AWS Lambda
- Designed and implemented an AWS Step Function to orchestrate and monitor the data pipeline

Facebook, Enterprise Engineering Intern

January 2018 — April 2018

- Built interactive and responsive frontend UI components using React and Relay
- Developed performant and scalable backend services using Hack and GraphQL

George Washington University, Research Assistant

November 2016 — May 2017, August 2017 — December 2017

- Conducted research under Dr. Timothy Wood in Network Function Virtualization
- Designed and implemented a dashboard and telemetry API for the [openNetVM platform](#), which our researchers use to investigate performance regressions and develop advanced features and Network Functions
- Co-author of [demo paper](#) presented at [ACM SOSR 2018 conference](#)
- Acted as System Administrator for a Linux cluster with over 50 nodes

Dell EMC, Software Engineering Intern

May 2017 — August 2017

- Developed automated system for Performance Engineering team using Python to detect significant performance regressions or improvements and notify users via email
 - Contributed to framework for automated performance testing of new product line
 - Modernized legacy code and expanded the feature set of a web application using the Spring Framework, which allowed users to view performance test results
-

EDUCATION

George Washington University

August 2015 — May 2019

B.S. - Computer Science

SKILLS

Programming Languages (Proficient): Java, C, Python, JavaScript

Programming Languages (Familiar): Hack/PHP, Android/Kotlin, Go, HTML/CSS, SQL

Other: Unix/Linux, Spring Boot, React, GraphQL, Relay, AWS / GCE
