

System Administrator / System Engineer Cover Letter

10766 Mitchell CornersWest Natashabury, ND 15866

Dear Drew Runte,

I am excited to be applying for the position of system administrator / system engineer. Please accept this letter and the attached resume as my interest in this position.

Previously, I was responsible for support for centralized server and workstation patching and software deployment systems, ensuring critical and high-priority patches are kept up-to-date on all Windows and Macintosh workstations and servers.

Please consider my qualifications and experience:

- Virtualization experience with VMware vCenter and ESXi KVM
- Experience with NetApp and Isilon storage, NiagaraFiles (NiFi) dataflow
- Knowledge of networking, DNS, web services (apache, tomcat), NFS, SMB, and OpenLDAP
- Familiarity with multitasking and multiprocessing
- Capable to setup monitoring, conduct performance audit and performance optimization
- Strong understanding of administration (user accounts, permission models, access control)
- Familiarity with networking (NAT, DNS, firewalls, basic routing, load balancing)
- Strong troubleshooting skills and familiarity with common Linux troubleshooting tools (vmstat, iostat, lsof, strace)

I really appreciate you taking the time to review my application for the position of system administrator / system engineer.

Sincerely,
