## EXPERIENCE

### DIYAR UNITED COMPANY

Project Lead, Smart Fueling Solutions

*June 2016 - June 2022*

- Led the implementation of RFID technology across 60 petrol stations, enhancing operational efficiency and customer experience.
- Managed project phases to minimize service downtime, coordinating with international suppliers to meet design specifications.
- Designed user experiences for applications that automated manual processes, aligning with consumer needs and industry standards.
- Collaborated extensively with clients to understand their design needs, aligning the project with their branding and user experience goals.
- Controlled project costs, progress reports, and team management, ensuring successful implementation within budget and timeline constraints.

### DELOITTE

Senior Business and Technology Consultant

*Jan 2012 - April 2016*

- Conducted in-depth analyses of business processes, identifying inefficiencies and proposing strategic improvements.
- Developed strategic recommendations based on competitive analysis and industry insights, delivering impactful solutions to clients.
- Delivered presentations and reports to C-suite management, communicating complex ideas and strategies effectively.
- Facilitated workshops and training sessions for client teams, empowering them with the knowledge and tools to sustain long-term improvements.
